CERTO FRUIT PECTIN

You can make delicious **STRAWBERRY JAM** in only 11 minutes cooking time... with CERTO

4 cups prepared fruit (about 2 quarts ripe berries and 2 lemons) 7 cups (3 lbs.) sugar 1/2 bottle CERTO fruit pectin

To prepare fruit. Crush completely, one layer at a time, about 2 quarts fully ripe, hulled strawberries. Measure 3 3/4 cups into a large saucepan; add 1/4 cup lemon juice.

To make jam. Add sugar to fruit in saucepan. Mix well. Place over high heat, bring to a full, rolling boil (takes about 10 minutes) then boil hard one minute, stirring constantly. Remove from heat; at once stir in Certo. Then stir and skim by turns for 5 minutes to cool slightly, to prevent floating fruit. Ladle quickly into glasses. Paraffin at once.

Yield: about 10 medium glasses (5 pounds). That's about 50% more jam from the same amount of fruit than you would get from "long boiling", and your jam will keep the fresh strawberry taste and color. You'll get perfect results every time if you follow the Certo recipe.
