N. Y. Stocks

NEW YORK, (AP)—The stock market shook itself free from a reaction Tuesday and bounded forward into new high ground again.

The surge ahead was strong and involved such key divisions as aircrafts, steels, motors, railroads and chemicals. At the same time it caught up in the rise such secondary groups as tobaccos and textiles.

The Associated Press average of 60 stocks advanced $1.50 at $153.80, a high since Sept. 7, 1929, when the average stood at $154.20. The industrial component of the average rose $2.70 to a new high of $209.20, railroads were up $1.10 to a new high of $122.60 and utilities advanced 10 cents.

Canadian issues were mostly higher. Canadian Pacific added 3-4, International Nickel gained 1-2, Dome Mines was up 3-8 and Distillers Seagram added 1-8. McIntyre slipped 1-4 and Hiram Walker remained unchanged.

Canadian issues on the American stock exchange—Lake Shore, Giant Yellowknife and Royalite Oil—remained unchanged.

Fruit Company Dispute Settled

GUATEMALIA CITY, (AP)—The United Fruit Company and the Guatemalan government Monday night signed a contract ending a dispute over 234,000 acres of banana land expropriated by the Communist-supported regime of former president Jacobo Arbenz Guzman.

The land will be returned to United Fruit which will withdraw its claim for $15,000,000 indemnity and give 100,000 acres back to the country. In addition the company will pay a 30-per-cent income tax retroactive to last Jan. 1.

UNHAPPY JUVENILE

LONDON (CP) — A policeman told a Lambeth juvenile court that when a 12-year-old smoker saw him coming the boy hid a lighted cigaret in his pocket, set his trousers on fire and had to have hospital treatment.

Major Aspects, Transportation To Be Discussed

OTTAWA (CP)—Some major aspects of the Canadian transportation picture may be discussed by Parliament at its next session starting Jan. 7.

Involved are such politically-touchy issues as subsidies on western grain freight rates, railway attempts to meet trucking competition, and the problem of railway commuter service.

The matter of grain rate subsidies by Chief Justice Gordon Sloan of British Columbia last month in his arbitration decision on contract demands of non-operating railway employees. In awarding them benefits costing $7,000,000 annually, he suggested a federal subsidy to relieve some of the effect on railways of the decades-old "Crow's Nest Pass", rates which keep freight tolls depressed on export grain moving through the west.

DISTORT PICTURE

Declining rail revenues, he said, were due in large part to distortion of the freight rate structure by the Crow's Nest pass rates and a subsidy would spread "some fair share at least of this burden" across the country.

There has as yet been no public reaction from Transport Minister Marler.

The cabinet may also have to decide whether to make any changes in the system of agreed charge contracts which the railways have adopted to meet competition from truck transport.

A report likely will be made during next session by Hon. W.F.A. Turgeon, a royal commissioner whose inquiry into agreed charge contracts is nearing a close. Agreed charges are special low freight rates granted by railways under contract with shippers who agree to give railways a certain share of their shipping business.

COMMUTERS PROTEST

Two recent commuter-rate cases heard by the board of transport commissioners probably will have repercussions in the Commons.

In the first, the board authorized a doubling of railway rates for carrying commuters in the Toronto area. The board has just finished hearing a railway application for a similar increase in the Montreal area.

In both applications, the railways argued that commuter rates did not cover their out-of-pocket operating costs.

MINES WANT HELP

Other transport issues may come before Parliament. One is a bid by western coal miners and operators for government subventions to help western coal move to eastern markets, coupled with higher tariffs on American imports.

Next session, too, the government is expected to form a royal commission to study coastal shipping problems and in particular the impact the opening of the St. Lawrence deep waterway will have on Great Lakes shipping.
