The bride looked charming in a street-length dress of celachrome turquoise taffeta, wearing a white feather hat and matching gloves.

Following a honeymoon trip to Niagara Falls, New York; the happy couple took up residence at 481 Brunswick Ave, Toronto.

The bride is employed as a T.V. Laboratory Technician and the groom is an employee at a Toronto Bank.

The Dangerous Cove Is Book-Of-The-Year Winner

John F. Hayes was born in Dryden, Ontario, but his family shortly afterwards moved to Winnipeg, Manitoba, where he received his formal education — if any activity of Hayes' could be called formal.

With his daily routine of work and study, Hayes mixed in such recreation as hunting, paddling, and fishing; such occupations as garage mechanic, clothing salesman, riveter in a steel mill, soda-jerker, advertising salesman, and bushman.

Whatever Hayes has done he has done it with a will. As an advertising man he saw how valuable it would be to be able to lay out a page of "copy" so well that the customer could see what he was buying.

Accordingly he set to work to learn art. He studied under Franz Johnston, once a member of Canada's famous Group of Seven. Hayes also wanted to know how to tell a story. He spent evenings attending extension courses in Creative Writing at the University of Toronto.

When still a young man he joined the staff of the Southam papers in Toronto and soon began his meteoric rise in the Southam enterprises. From the Southam Company Limited he was transferred to the Southam Printing Company Limited, of which he is today Vice - President and Managing Director.

Mr. Hayes began writing fiction in his spare time. His early successes included stories in boys Life and open Road for Boys. His stories have appeared in school books, both in Canada and in the United States, and have been translated into Braille by the New York Institute for the Blind. Some of his books have been adapted for radio dramatization by the Canadian Broadcasting Corporation.

His books have been reprinted in the U.S.A. and in Britain, and two of them, Buckskin Colonist and Bugles in the Hills, have been translated into German. His first complete book was Buckskin Colonist, and the list includes Treason at York, A Land Divided, Rebels Ride at Night, Bugles in the Hills, before the Dangerous Cove.

In this series of stories Hayes has given fresh and vigorous life to many areas of Canada's history. He has twice won the Governor-General Literary Awards for juveniles—with A Land Divided, in 1951, and with Rebels Ride at Night in 1953.

Mr. Hayes now lives in Toronto, Ontario.

WE AND OUR NEIGHBORS

Adjustment Does Not Mean Slavish Following

By Ruhamah S. Frank

Thoughtful parents and teachers have undoubtedly noted the verbal brick-bats authoritative writers are throwing at the "adjustment" theory. We are making our children so well-adjusted, they say, that they grow into adults who conform to their group so closely that they lack individuality, independence, initatiative. They claim that this is exactly the trouble with our present generation.

MORE THAN INITIATIVE

I certainly do not agree with this--but let us assume that the present generation cannot show the outstanding achievement of the past generation. On the Island, for instance. There are certainly flourishing enterprises started by old timers here, from scratch. Can those, with an equal amount of initiative, independence do as well, now? Oor would it need also large sums of money to start any significant project in this day of chain business, expensive machinery? In any case, I cannot see how the adjustment theory has anything to do with the situation.

ADJUSTMENT AND NATURE

It would be a great pity if parents and educators lost their faith in helping children--who needed help--adjust to their group. The average child never needed and dosen't now need to much attention in this direction It is a basic law of human nature to wish to be liked accepted-and if possible admired by others The large majority of children (and adults) share to a considerable degree, the tastes, interests activities of their group without any effort. They belong. They fit in. They have moods of rebellion, but the desire to be liked keeps them in line.

EXCEPTIONAL ONES

The exceptional ones, however, had a pretty rough time of it before modern psychology called attention to their special need for help in "adjusting" to their group. We know the sad plight of the retarded child when he was classed as stupid, inattentive, willfully disobedient---or when he was simply isolated from others. We know the plight of the over-shy, over-sensitive. Or those .. whose lives were made miserable by striking physical defects or lacks. And recently we have been made conscious of the situation of the "gifted" child whose talents were not recognized----and who could not "fit in" with the average. Our emphasis on "adjustment" was a decided factor in our changed attitude to the esceptional individuals.

CAUTION

"Adjustment" does have its dangers too. We can overlook a child's (or adults) real interests and try to get him to take on others that conform to the majority. There is no need to push a child into athletics if he is happier with a book (but is he happier, or is he afraid to be with the other children?). But an even greater danger is encouraging our children (and grown-ups) in their wish to "fit in" to such an extent that they are afraid to speak out, to sponsor an unpopular cause. Adjustment does not mean slavish obedience to the majority.
