Farm Prices & Market Report

The following market report has been received from Mr. S. C. Wright, senior agricultural representative of the P.E.I. Department of Agriculture:

EGGS There is practically no change to report in the egg market situation. Receipts gradually increasing with quality generally good. Some receipts going to other Atlantic Provinces with the surplus to Montreal in carlots. All interested in the poultry industry should do their utmost to hold our markets by selling a top quality product.

CHARLOTTETOWN dealers are paying for the ungraded eggs delivered Charlottetown: AL 29, AM 25, AS 19, B 19. For the graded pack delivered Charlottetown: AL 24, AM 30, AS 24, B 24. To retailers in cartons: AL 40, AM 36, AS 30, B 30. To consumers: AL 48-50, AM 43-5, 37-8, B 37-8.

Summerside: AL 30, AM 24, AS 18, B 18, C 12. Ungraded product delivered. Bequeque: AL 30, AM 26, AS 21, B 22, C 17. Ungraded product delivered. Montague: AL 29, AM 25, AS 18, B 18, C 12. Ungraded product delivered.

FEEDS The feed market has apparently eased a trifle since a week ago, and the quotations on No. 1 feed oats bulk carload delivered are \$2.75; No. 1 feed barley \$2.90; and No. 6 wheat \$2.95, all bulk carlot delivered. Millfeeds are a bit stronger than they were last week, and there has been no change noted in the price of concentrates and proteins.

DAIRYING The price of butter on the Halifax and St. John markets still continues the same as that of previous weeks, the wholesale price of first grade one and two-pound prints being quoted at 65c delivered, local jobbing to retail stores 65c. The jobbing price in the Province is also 65c delivered, and the wholesale price is that of Nova Scotia and New Brunswick delivered, less freight and handling charges. Montreal current receipts are quoted at 61c, and Toronto at 61c-61 1/2c.

Since our last week's market letter was written, we are informed that the Agricultural Products Board will offer its surplus storage stocks of butter to public institutions at 40c per pound. No details were given as to the manner in which this butter will be distributed, but it is understood that it will be through the regular commercial channels.

At the present time there is only one carload of 1954 storage butter left in the Government warehouse at Charlottetown. The production of butter for the week ending January 29th was 44,549 pounds, compared with 51,164 pounds for the same week last year. This is a decrease of 6,615 pounds, or 10.9%.

POTATOES

The movement of potatoes has been rather slow during the past week. Even with this slowdown of movement the price is somewhat weaker than it was last week in most areas. The general price seems to be \$1.40 for the contents of a 75 pound bag delivered to the station, with Cobblers being quoted at a nickel less. While this price seems to be more or less general there are some shipping points that are quoting \$1.45, but these apparently are for special orders, and could not be taken as the general price being paid. Seed shipments are down from the previous week with 37,472 bushels shipped since our last report.

In turns the demand is light to fair, with the dealers paying 45c bulk per bushel to the grower. LIVESTOCK The cattle trade is slow in Montreal, especially on steers, with all grades about steady, with Good Steers being quoted at 20.50 to 21.00; Medium 18.00 to 20.00. Good Beef type cows 11.00 to 12.00, with a few at 13.00. Good dairy type 10.50 to 11.00; good and choice veal calves are quoted at 18.00. Quotations are changed somewhat at Moncton with the rest of the 25.00 to 27.00, with a few at 28.00. On our Maritime markets cattle prices being steady with last week.

The following are the quotations: Hogs at Moncton: Grade A 27-50; B 1 26.50; No. 1 sows 19.00; No. 2 sows 18.00; hot dressed weight delivered. Hogs at Charlottetown: Grade A 26.50; B 1 25.50; No. 1 sows 18.00; No. 2 sows 17.00; F.O.B. country points. Cattle at Moncton: Delivered to plant. Steers: Choice 17.25; good 16.75; medium 14.00 to 15.00; common 11.00 to 13.00. Heifers: Choice 16.75; good 15.75; medium 13.50 to 14.00; common 11.00 to 13.00. Cows: Good 9.50; medium 9.00; common 8.00; canners and cutters 6.00 to 7.00. Bulls: Good 9.00; medium 8.00 to 8.50; common 6.00 to 7.00. Calves at Moncton: Delivered to plant. Choice 18.00 to 19.00; good 17.00 to 18.00; medium 14.00 to 15.00; common 12.00; grassers 9.00 to 10.00. Cattle at Charlottetown: Delivered to plant. Good choice 17.00; medium 15.00; common 10.00 to 12.00; grassers 7.00 to 9.00. For the week ending February 5th there were 36 cattle and 30 calves rail graded, and these brought the following prices: Steers B 31.75; C 24.00 to 30.75; D 1 under 350 pounds 19.00, over 350 pounds 26.75; D 2 21.00; D 3 19.00; M 15.75; S 15.50 to 16.50. The prices for heifers ranged from \$1.00 to \$2.00 lower than that of steers. These prices are not dressed weight defatted and delivered. Calves brought the following prices: A & B 23.00 to 29.00; C 21.00 to 24.00 according to weight; D 19.00; M 18.00. Calves are hot dressed weight delivered with the skin on. These price mentioned are actual prices received for the 36 cattle and 30 calves which were rail graded for the week ending February 5th.

Potato Tariff

"And Whereas our potato producers are compelled to ship to United States markets because our Canadian markets are supplied by United States growers in nearby States; and Whereas our Prince Edward Island growers received less than the cost of production last year and this year are receiving very little over the cost of production for their potatoes; therefore Resolved that this House of Assembly unanimously express our considered opinion that the heavy United States duty on Canadian potatoes while United States potatoes enter Canada free, is utterly unfair to Canadian producers."

"And Further Resolved that this Legislative Assembly in Session Assembled, urgently request the Dominion Government to take immediate steps to confer with the United States Government on this very unjust tariff against our potatoes."

RESOLUTION DISCUSSED

In moving the resolution, Mr. Cullen said that the matter of tariffs with the United States was not a new thing. He recalled that a number of years ago an agreement had been reached with that country which was fairly satisfactory to the Canadian potato producer "some might say that we should leave well enough alone for fear of losing some of our concessions or that the barriers might be raised," said Mr. Cullen. He said, however, since that time matters have greatly changed. The present administration in the States has put the tariffs higher and higher and the rate of exchange at the present time is not in the favour of the Canadian shipper. He went on to show that previous to 1950, the floor price on American potatoes was such that selling in the U.S. was profitable.

Stable to both American and Canadian dealers to such an extent that production became high and much of the crop had to be dumped. In 1950 when the floor price was removed in the States, production continued on the same level and when they lost their own market, the American dealers sought the next nearest market which is in Canada. Statistics released last year show that Canada bought more American potatoes than the Canadian potatoes sold in the United States. He pointed out that the American potatoes were competing with Canadian potatoes free of tariff, while Canadian exporters were paying at the rate of 75c per 100 lbs. He felt that it was not a case of asking for a raise in Canadian tariffs but a suggestion that the American tariffs be lowered on an even basis with those of Canada. Mr. MacNutt agreed with Mr. Cullen. "We must do everything we can to protect our trade with the United States," he said. "We have to contend with high freight rates and at the same time meet the competition of American potatoes on the Canadian market." Mr. MacNutt suggested that the government deal very carefully with the matter. He urged that no drastic measures be employed. "Many items have to be taken into consideration in the adjustment of tariffs," he said. Mr. R. R. Bell said he was in agreement with the resolution, with a few minor amendments, that he intended to support it. He gave notice that one of the amendments he would include in the motion would be in connection with the importation of New Zealand cheese. Mr. Douglas (L. Second Kings) intimated his intentions to speak to the motion, but owing to the lateness of the hour made a motion to adjourn. Premier Matheson said that the House would resume on Monday at 3:00 p.m. He suggested that at that time the Draft Address debate would be continued.

Ice Sports At Montague

The Montague school will stage its annual ice sports tonight at the rink in elimination contests to pick those who will represent Montague school at the provincial ice sports to be held in Charlottetown, at a later date. This annual feature event has always produced keen competition among the large number of entries in each class. This year with the increased enrollment it is expected that the ice sports will be an outstanding program both for children and parents alike. The evening will be climaxed with a girls hockey game between School Unit No. 1 from Charlottetown and the Montague High School girls, followed by a boys game between the same two schools. A skate for all will conclude the evening's entertainment.

UNIDENTIFIED SUBS SEEN - OSLO, Norway (Reuters)—Unidentified submarines have been observed in Varanger fjord, north Norway, near the Russo-Norwegian frontier, the Oslo evening newspaper Dagbladet reports Monday. It says two submarines had been seen on the radar screen of a coastal steamer.

NEW FREEDOM FROM IRREGULARITY

—you owe it to yourself to try this safe natural way to overcome irregularity

In recent years great strides in medical science have been made in the field of nutrition as it affects health. Naturally many research scientists have turned their attention to one of man's most universal complaints—"common constipation." Why are some people troubled with it while others are not? And why is it so often a progressive ailment—hastened in its course from occasional, to common, to chronic by the unwise use of drug-type laxatives?

In natural foods, lifelong avoidance of common constipation. It has long been a medically recognized fact that nature has provided—in the foods men were intended to eat—all the elements necessary for avoidance of common constipation. One of these elements, natural fibrous bulk, is ideally found in the outer layers, or bran, of the whole wheat kernel. Unfortunately this portion is often lost in modern milling.

Why All-Bran proves so effective

The greatest advantage of All-Bran is that it corrects the cause of irregularity due to insufficient bulk. Chemical or drug-type laxatives, on the other hand, are intended only for overnight relief of a temporary stoppage. If you feel you must use them, read the instructions carefully and avoid excessive use. But for natural and lasting relief, put your trust in nature and give All-Bran a try. Eaten daily, All-Bran can help improve your "intestinal tone" so necessary to comfortable, natural regularity.

A delicious, wholesome dish

Kellogg's All-Bran has an appealing, nut-like flavor. Whether you prefer it with hot milk or cold, you'll find it retains much of its original crispness even after liquid is added. But remember this: be sure you get the original, the one and only All-Bran—Kellogg's. Kellogg's has been making and improving All-Bran for nearly 40 years. And Kellogg's stands squarely behind it.

Satisfaction Guaranteed

Eat Kellogg's All-Bran for 10 days. Drink plenty of water. If you do not enjoy gentle, effective relief from constipation, simply return the empty carton and we will send you double your money back. That's a promise from Kellogg's, London, Ontario.

W. K. Kellogg's Original Whole Wheat Bran Cereal

The known value of bran in promoting regularity prompted W. K. Kellogg (in 1916) to develop a complete, whole bran cereal. He insisted that nothing be taken away from the bran that would lessen its effectiveness. Proof that this natural laxative cereal is effective is provided by its widespread acceptance and use. Kellogg's All-Bran has literally helped millions. Clinical evidence of the value of All-Bran has also been demonstrated by a series of studies reported in leading medical journals. In one such study, 135 people with known delayed bowel function were given an ounce of All-Bran daily for one week. Of these, 107 showed definite clinical improvement in bowel activity in just 7 days.

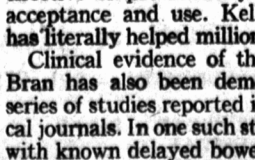

READ HOW KELLOGG'S ALL-BRAN HAS HELPED TYPICAL SUFFERERS FROM CONSTIPATION

(due to lack of bulk) From Mrs. W. Beauce of Sherbrooke, Que. "I had taken a home remedy and many costly medicines to keep regular. Then I tried Kellogg's All-Bran. I have never been bothered with irregularity since."

A letter from Mr. H. W. Farmer of Windsor, states: "After suffering for over 10 years I'm free from irregularity thanks to Kellogg's All-Bran. I tried everything—costly foods and laxatives—only to find your inexpensive cereal did the trick."

Mrs. E. Pulley of Ottawa, Ontario, relates: "Taking laxatives for months left me tired, nervous and miserable. But Kellogg's All-Bran has helped me to happiness. Now I feel like myself again."

Writes Mr. J. G. Mills, of Halifax, N.S. "It's a pleasure to be rid of harsh laxatives. I've had no trouble with irregularity for 18 months, since taking your gentle but effective laxation cereal—Kellogg's All-Bran."
