Local and Other Items.

HAY sells in St. John at $11 and $12 a ton.

ST. LOUIS has been visited by an earthquake shock.

CONEY ISLAND sustained $100,000 worth of damage during the late storm.

MR. HOGAN informs us that he has no share in the Peake's Station starch factory.

THE net profits of the Toronto Exhibition amount to about eight thousand dollars.

REV. DR. KINGDON, Coadjutor Bishop of Fredericton, is confined to his room by illness.

THE Pictou lobster factories have all closed for the season. The catch has been comparatively poor.

LUNENBURG has a potato weighing 3 lbs. 9 ounces. The *Progress* calls on other counties to beat it if they can.

JAY GOULD is buying up the telegraphic lines in the States, and is now attempting to buy up the leading commercial journals across the border.

KING'S COUNTY EXHIBITION takes place on Wednesday. Mr. Archibald has kindly arranged that the afternoon train shall on that day leave Georgetown at 5 o'clock, instead of at 3 o'clock as usual.

A SCHOONER from P. E I, with sixty head of cattle for St. Pierre, went ashore on Tuesday, the 19th inst., near Louisburg. Twelve of the cattle were drowned, and the remainder were landed and sold at public auction.

THE Austrian Government has been authorized to disburse 700,000 florins in relief to sufferers by the floods in the Tyrol. Great floods have also occurred in Northern Italy, where the weather, however, is now improving.

RHEUMATISM CURED.—Consult Mrs. Carr, and be cured of rheumatism. Medicine given, in which no rubbing is required. The very worst cases can be cured, and will never again give trouble. This is no fraud. Residence, Osborne House.

THE steamer *City of Toronto* was tied up last Thursday, on her return trip from Niagara, by order of Government Inspector Mereilly. Although notified to get out a government certificate, her owners neglected doing so. Hence the present action.

"Suffering with rheumatic pains I was Didymus as to remedies. I read of St. Jacobs Oil and said here goes for a half dollar trial. I bought a bottle and before it was half used the screw-wrench pains had gone—and they troubled me no longer," says Ernest King Esq., editor of the Fall River, (Mass.) *Sun*.

GREAT preparations are being made at the Toronto observatory, for the coming Transit of Venus, from which the exact distance from the earth to the sun is to be determined. Many new scientific instruments are being added, and a large tower for the purpose is being built on the top of the observatory building.

THE stimulus which the construction of the Canadian Pacific Railway is giving to all branches of trade may be inferred from the fact that during the month of August the disbursements of the Company amounted to $2,000,000. The circulation of so large a sum of money vitalizes commerce to a wonderful degree.

ELEVEN persons on Bird Rocks, in the Gulf of St. Lawrence, are reported as being without food and unable to communicate with the shore on account of the bad weather. The agent of the Marine and Fisheries Department Quebec, has telegraphed to the Magdalen Islands to have a supply sent sufficient to last until the annual supplies arrive from Quebec.

TORONTO had its Brazilian exhibit, Kingston had its Manitoban exhibit, Montreal its Mexican, and now Hamilton boasts of having an Australian exhibit. This exhibit consists of five imported ostriches, an immense quantity of sample furs, consisting of seven varieties of kangaroos, seven varieties of Rock Wallaby, black Tasmanian sable, different varieties of opossum, varieties of genuine grebe swans, bear skins, kangaroo leather, besides minerals from the different mines of Australia, as well as a large lot of other interesting product.

MR. LYDIARD supplies the following statement of exports of P. E. Island produce from Charlottetown, for Queen's and King's Counties, during the month of September, 1882:—

	Value.
Lobsters, 12,422 cases	$ 55,899.00
Mackerel, 3,913 barrels	27,391.00
Fish, other	4,170 00
Starch	4,000 00
Eggs, 82.110 dozen	16,422.00
Oats, 8,420 bushels	3,368 00
Potatoes, 5,077 bushels	1,532.00
Miscellaneous	8,375 00
Total	$121,157.00

AN American medium, Miss Wood, found great favor with the Spiritualists of England, and not the less because she was young and handsome. She gave materializing seances, like those invented by the Eddy brothers, but she did not take the precaution to guard the returned spirits against assaults by the spectators. The result was that, at Peterborough, a stalwart man seized the form of "Poche, an Indian girl," who ventured too far from the cabinet, the lights were turned up, and Miss Wood, in Indian costume, was seen struggling violently in his arms.

A CORRESPONDENT at Red Rapids Settlement, Tobique, sends us the particulars of a strange case of fright which occurred there the other evening. A little girl, a daughter of Mr. Charles Willet, who was visiting at Mr. C. Roberts', was sent into the milk room for an empty pail. As she did not return, another child was sent to look for her, and found her lying on the floor senseless. She has remained ever since unconscious, but exclaims at intervals, "It took hold of me; it took hold of me," from which it is inferred that the child has been frightened by something. The medical men entertain but slight hopes of her recovery. The case is certainly a very singular one.—*Telegraph*.

PERSONS who have invested in the shares of the Panama Canal Company will not feel encouraged by the report which a French engineer has recently given upon that enterprise. This gentleman has embodied his views in a pamphlet in which he paints the future of the enterprise in the gloomiest colors, and accuses M. de Lesseps of befooling the public. All accounts from disinterested parties at Panama certainly confirm the statements of this engineer. All that has thus far been done there is the very opposite in extent from what M. de Lesseps reports. It is not at all probable that the Canal will be open in 1885, the time indicated by M. de Lesseps.

From All Quarters.

The British Anti-Slavery Society has appealed to Mr. Gladstone to suppress slavery and the slave trade in Egypt.

The Dominion Government have entered a suit against Mr. Gilbert, of the Canada Engine Works, for breach of contract in connection with changing guns to breach-loaders, for $9,000.

Another step towards the entire and final completion of the Cologne cathedral has just been taken. The iron scaffolding for use in putting on the roof is in place, and the men are about to begin the work of laying down the leaden plates. Great care will be brought to bear upon this work, as the plates are expected to last for many scores of years.

Brandy snaps are made of one pound and a quarter of butter, half a pound of sugar, one pint of molasses, a tablespoonful of ginger, and flour enough to roll out the same as ginger snaps are rolled. Roll them and bake in a hot oven. If you choose to take the trouble, have a bowl of powdered sugar at hand, and when they are taken from the tins dip them one by one in the sugar.

The cargo steamships of the Allan Line which have arrived at British ports since the opening of the season of St. Lawrence navigation, took out from Montreal, 4,499 oxen, 14 horses and 3,445 sheep, and from Boston 1,153 oxen, which were all landed in good order and condition, with the exception of 4 oxen and 22 sheep, the mortality being only one-fourteenth of 1 per cent on sheep.

There was an insurance of £1,000 on the life of Lamson, the American murderer hanged in London, written by the Scottish Widows' Fund Assurance Office. Immediately before Lamson's conviction the policy was assigned absolutely to Mr. A. W. Mills, the solicitor by whom he had been so zealously defended to cover the balance of the costs of the defence. On the strength of a decision in the House of Lords, payment could have been refused, but the money was paid.

The telegraph is not infallible. One of the funniest mistakes it has made of late was to send into the office of a contemporary as a part of a speech delivered at the Methodist conference the sentence:—"Behold how good and joyful a thing it is for brethren to *drink* together in unity." What is funnier still is that the editor, the printer, and the proof-reader, through whose hands the copy passed, considering that the principle laid down was a very proper one, failed to see the mistake, and allowed it to go into print.

Canadian trade shares with English commerce the attention of American statisticians. The United States reports call attention to the new manufactories established in the Dominion, especially for cotton. There is no longer danger of our markets being flooded with old stocks drawn from Massachusetts. Our neighbors will be sufficiently occupied in holding their own market. A perusal of some of the evidence given before the Tariff Commission would lead to the opinion that they were alarmed at the influx of Dominion products. Times have verily changed.

Among Emperor Napoleon's papers was found the plot of a novel in his own hand. The hero comes to Paris with his head full of Republican ideas, and is converted to Bonapartism by the sight of the city which the Emperor had developed so magnificently, and by learning how much he had done for the workingman. The story of protection runs along the same lines. The foreigner comes to America with his head full of free trade ideas, and is converted to protection by the sight of the manufactures which it has developed, and the good wages given to the workingman.

It is reported from Vienna that the Empress Eugenie has bought the chateau and park of Wasserberg in Syria, from Baron von Herzinger, for £60,000. "It is no secret," says London *Truth*, that the Empress quitted England in high dudgeon at the attentions which were shown to Cetewayo and it is by no means improbable that she will in future pass most of her time abroad. She is not at all delighted with her new residence near Farnborough, which cost a large sum, and which has lately been much enlarged, no fewer than 18 rooms having been added to the house.

In alluding to the Pullman cars which the London and North-Western Company has added to its fast Liverpool train, the London *Times* makes the frank admission:—"The adoption of this novelty is mainly due to the protests of the very large and increasing public which is constantly visiting our shores from beyond the Atlantic." The gratitude which English travellers ought to feel toward their American cousins is indicated by the fact that the *Times*, in describing the new car, remarked with evident satisfaction and surprise that "the necessity for using feet warmers is obviated by an ingenious arrangement of hot water pipes running under the seats and around the compartments.

The day is fast approaching in which three great railway lines stretching across the continent to the Pacific Ocean will be in active operation. Our own road will be in operation for more than six hundred miles west of Winnipeg by the close of this year, making a completed line from Prince Arthur's Landing westward for nearly 1,100 miles. The track of the Northern Pacific Railway is now nearly 950 miles west of St. Paul and less than 450 miles remain to complete connection with the western end. Track is going down westward at the rate of about one mile and a half per day, and is also pushing steadily from the opposite direction. Very much of the heavy grading and rock work is already completed, and at the end of this season it it is believed that not more than 250 or 300 miles of track will remain to be laid.

Horsford's Acid Phosphate

is a scientific preparation of the phosphates, so combined as to be readily taken into and absorbed by the system. Pamphlet sent free.

Rumford Chemical Works, Providence, R. I.

[sept. 28. wkly.

DIED.

L. H. DAVIES.

Charlottetown, June 27, 1882—law pat tf

NOTICE.

THE Charlottetown Gas Light Company have imported a fresh supply of Bray's Patent Burner's, especially made to consume only three feet of Gas per hour with the tap turned full on. These Burners are intended for use in Halls, Bedrooms, Kitchens, and other places where a light from a small consumption of Gas only is required.

By regulating the tap, the Gas consumed can be reduced to any desired quantity less than three feet per hour.

These Burners are so scientifically made that they will give a light equal to about ten candles at a cost of three quarters of one cen per hour.

The price of these Burners to consumers of Gas will be ten cents each. [ju 10 eod pat
