ZION CHURCH.—One of the most entertaining lectures delivered this winter will be given by Mr. McCready in Zion Church basement on Thursday evening. Hear his vivid portrayal of "Scenes in the Canadian Commons."

CORRECTION.—A birth notice, copied from the Agriculturist, in which the names of Mr. Alexander Corbett and his wife, of Montrose, were mentioned, was bogus. The Agriculturist will, if possible, discover and publish the name of the despicable trickster who sent the notice for publication.

LECTURE.—In St. James' Hall on Monday evening 12th inst., Rev. Mr. Fullerton will deliver a lecture on Edinburgh, which will be illustrated with stereopticon views. Mr. Fullerton visited the Scottish capital in 1895, and with his well-known descriptive power will no doubt make a most entertaining address. Those who heard his splendid lecture on London will look forward to a genuine treat.

TEMPLARY.—In October 1894, Rev. James Graham organized Charlottetown Lodge, No. 68, I. O. G. T., in this city with between 20 and 30 charter members. As time advanced some grew discouraged and gave up the fight, others left their island home to seek fortune elsewhere, and a few forgot the obligations taken to advance the work and push moral reform. One member, after fighting the good fight below, has gone to join that brotherhood which death cannot sever. Still quite a number stood nobly and loyally to their charter, worked heartily and enthusiastically and now Charlottetown Lodge has a membership in good standing of upwards of one hundred, nearly all full of red-hot enthusiasm. Some of the city's most prominent and talented people are active and interested workers. The lodge, which meets in social intercourse every Thursday evening is a home for any who sincerely desire to break the drink habit, or any who wish by influence, word or example to aid others. About thirty people were initiated during the past two months and this month will undoubtedly show an increase over either of those. Probably no society held such interest or attraction for its members as those of the past few months in this lodge and many excursions and pleasant outings are looked forward to for the warmer sea-on. The initiation fee is 75 and 25 cents for male and female applicants respectively. While the evenings are cool those who intend connecting themselves with the order should hand in their names as initiation is not so pleasant in warm weather.

SONS OF TEMPERANCE.—Last evening Victoria Division was the scene of a very pleasant event. After the installation ceremony was performed, the lady members of the order served the members with cake, coffee, fruit and confectionary to the delight of all present, after which a spicy programme was rendered with speech, recitation and song in fine style by the different members. Before closing, a vote of thanks was moved by Bro. G. G. Jury, seconded by Bro. W. Gough, to the committee in charge for the able manner in which they conducted the evening's enjoyment.

TROOPS FOR ENGLAND.—Major Parry, Adjutant of the 82nd battalion, received a communication this morning, enquiring as to how many men the 82nd could furnish towards a provisional battalion of infantry to represent Canada at the Queen's Diamond Jubilee. Such men to be not less than five feet eight inches in height and 37 inches chest measurement, and between the ages of 20 and 35 years. Having consulted with Lieut.-Col. NOTES AND COMMENTS.

—Where is the Petrel now?
—Wouldn't it be a good idea for the Stanley to come to Charlottetown?
—An Ottawa despatch says that it has been ascertained that the memorial to his Holiness the Pope, asking for the appointment of a delegate was signed by practically every Liberal Senator and member in the House at the close of last session. Hon. Mr. Laurier's name was the first signed and among the others were: Hon. J. I. Tarte, Hon. Charles Fitzpatrick, Hon. R. W. Scott, Hon. C. A. Goffron. The Laurier Government then sent their own Solicitor General to Rome who presented the petition and made arrangements for the coming of the Delegate who has duly arrived in Ottawa and has doubtless ere this commenced his conferences.

A Public School in Germany.

It was 8 o'clock, and school was about to begin. At a signal from the teacher the boys arose in their places, and with bowed heads stood in reverential silence while one of their number recited a short prayer. As soon as the boys were again in their seats the teacher began the recitation, and I began to gaze about the room. There were nearly 50 boys seated on ten plain board benches, with the same number of equally long and plain desks in front, an almost exact reproduction of the furniture of the New England district schoolhouse of a generation ago.
The teacher's desk, which stood upon a high and very small platform, was equally inexpensive and devoid of ornament. The walls and ceiling of the room were of a soft brown color slightly tinged with green, while the benches and desks, including that of the teacher, were stained a darker brown, excepting the tops of the desks, which were painted a dull black. There were windows on only one side of the room, and the seats were so arranged that the rays of light fell upon the pupils' books over the left shoulder. There was only one blackboard in the room, and that was a small wooden one which was placed behind the teacher's desk and was accessible only to a person standing upon the teacher's platform. Crayon marks upon the blackboard were removed by means of a moist sponge, never with a dry eraser. In many of the schoolrooms which I subsequently visited there were a few good pictures to be seen, and the tint of the walls varied somewhat, but in all essential features that first school-room was typical of all that I saw afterward.—Educational Review.

A Success.

"Were your theatrical entertainments for charity a success?" asked one girl.
"Yes, indeed. We got \$107.25."
"Indeed! You must have had a large audience."
"No. We took in \$7.25 at the ticket office, and father gave us \$100 never to do it again."—Washington Star.

Hammers.

Hammers are represented on the monuments of Egypt 30 centuries before our era. They greatly resembled the hammers now in use, save that there were no claws on the back for the extraction of nails. The first hammer was undoubtedly a stone held in the hand. Claw hammers were invented some time during the middle ages. Illuminated manuscripts of the eleventh century represent carpenters with claw hammers. Hammers are of all sizes, from the dainty instruments used by the jeweler, which weigh less than half an ounce, to the gigantic 50 ton hammer of ship building establishments, some of which weigh as much as 50 tons and have a falling force of from 90 to 100. Every trade has its own hammer and its own way of using it.
