Signed His Cheque "Kings Of Kings" VICTORIA, Aug. 10 — (CP) — A 60-year-old man, termed by police a mental case, tried to force a bank teller here yesterday to cash a \$15,000 cheque made out to the "King of Kings".

The man, armed with an air rifle, presented the cheque to teller Marie Beale in the main branch of the Royal Bank of Canada and demanded payment in \$10 and \$1 bills.

He pointed the muzzle of the rifle between the bars of the teller's cage, telling her: "It's loaded."

"The man then grabbed the cheque," said Miss Beale. "He started to walk away and he then turned and fired the gun toward me."

The pellet knocked paint off a sign a few inches from the cage bars.

A short time later police arrested the man. His name was not disclosed.

The cheque was found to be signed by, as well as made out to, the "King of Kings".

Of the fine arts—painting, music, sculpture, architecture and poetry, Hegel placed architecture lowest and poetry highest, because of the material basis of the former. We could get along without these, for we could exist in abodes which might be strangers to all cultural decorations, whose proportions owed little or nothing to the graces of architecture; but in anything like civilization we look for all these. They exist because of a hunger for the beautiful in sound, form and sight.

Now while the mechanical arts serve utility, the finer arts minister not so much to our comfort as to our pleasure. It is hard to define art. It has been defined in these terms: It is the presentation of the real in its mental aspect. The poet Coleridge said it was the mediatress between man and nature, the power of humanizing nature, painting was the intermediate something between a thought and a thing.

It is generally admitted that the chief function of art is to give pleasure; so it is that we like to see nice curves of bay, light on water, like, to use Shelley's fine figure, light dissolved in star-showers thrown, sunsets' graceful and well-proportioned human forms; like to hear the stationary blasts of waterfalls, the nightingale, the laughter of children, a

chorus ending from Euripides, or the vowel effects of human speech, are impressed by stiatuary, or the suggestiveness of a great line of poetry—half-concealing, half-revealing the artist's thought.

We are carried away by great oratory and carry for years the content of some musical voice put into a note or word of a song. We are moved or carried along as the Greeks said: "His is a high kind of pleasure for it touches the soul."

There are those who go far beyond this and contend that art has a mission, but it is generally conceded now that this service must come indirectly. The novel that has a mission is discounted if that mission be obstructed. The novels of George Eliot have been criticized for that very reason. However, Tennyson said that the purpose of the Idylls of the King was to shadow forth the war of sense with soul.

Poetry that is didactic is looked upon as of a lower nature than that which serves no utilitarian purpose. This does not mean, however, that art has no mission. As great a writer as Wordsworth said in his manifesto that his task was to console the afflicted, to add sunshine to daylight, by making the happy happier; to teach the young and the gracious of every age to see, to think and feel and therefore to become more actively and securely virtuous. He hoped that his verses would have this effect long after he was in his grave.

When Wordsworth reveals the beauty of the outdoor world, nature means more to me and I feel like taking my shoes off, for there is a spirit in the woods, and when

Milton says they also serve who only stand and wait, I see that there is service in resignation. There is no reason why beauty and utility should be divorced, for there is no virtue in living in a mean-looking house with ragged lawns; no reason why books should not have good bindings, none why little children should not have pretty clothes, or that our vocabulary should be void of beautiful words, or that our voices should be high and harsh.

Byron said once that happiness was born a twin, meaning for one thing that it should be linked with service, so beauty and utility need not be kept asunder. But while the prime aim of art is to give pleasure, all subjects are not equally artistic. Moreover they must be treated so as to issue satisfactorily. The aesthetic something in them must be satisfied. When we read of the dog watching by its dead master in Wordsworth's poem, "Fidelity," we have at once a higher appreciation of the lower creatures, in other words we are pleased.

Keats said this about his art: the great end of poetry is that it should be a friend of man to soothe his cares and lift his thoughts, and the greatest of our dramatists said: "The man who hath no music in himself, Or is not moved by harmony of sweet sounds Is fit for treasons, stratagems, and spoils. . . . Let no such man be trusted."

As another declared: "To lack the love for the beautiful is to be without love of human nature and reverence for God."
