Steel Output In U.S. Heads For High Level

CLEVELAND (AP) — Several factors suggest steel production in March will top 5,000,000 tons, the highest level in nearly a year. Steel magazine says: Seasonal factors and some inventory building, added to a market that's riding an up-trend, will stimulate output, says the metalworking weekly. But "there won't be a boom to rival last year's because buyers have learned that they don't have to do all their stockpiling in the first quarter." It continues: "They feel the odds are against a strike, so they'll gamble on building their inventories gradually. That's why steelmakers may be spared last year's boom-and-bust cycle." "Barring a quiet settlement of the labor question, production will continue rising through the second quarter."

New Wood I.-Caribou Ferry Is Now Under Construction

Capt. Claude Hunter, president of Northumberland Ferries Limited, said work is progressing "on schedule" on the new ferry being built at Pictou for the Wood Islands-Caribou run. The keel was laid Feb. 12, he said, and the work of prefabricating certain sections is being carried on in the plant shops of Ferguson Industries Limited, which last year won the contract for the project, worth approximately \$2,500,000. When launched in May, 1964, just in time for seasonal year, the ferry will join the MV Lord Selkirk to provide more efficient, faster service on the 14-mile route. Last year was the greatest year in the firm's history, as a record number of passengers (118,010), cars (51,500) and trucks (10,280) were carried. This was accomplished despite a late start due to ice and for one month the Lord Selkirk was the only ship in operation.
