### The Care of the Cook Stove.

Why is it that I burn out so many sets of stove linings? some one asks. Let me tell you, writes Nellie Willey in Good Housekeeping. Use a little more care than you have been using, watch and see that a clinker is not allowed to form on the linings, and if one does form, remove it carefully with the poker. At night the fire-box should be even full of coal after raking out all the dead cinders and ashes in the range; never fill your stove with coal above the top of the linings. Never use a shaker when it is possible to avoid it; instead, use the poker freely, and you will have a better fire and use less coal. Shaking the fire banks it down into a solid mass and the air cannot circulate through. When the fire from any cause becomes dull, do not stir it over the top or put in wood, but rake out the cinders and open the draughts. At night do not close the draughts as soon as the coal for the night is put on, but let it burn a short time, or as one man expresses it, "until you think the coal is warm all through." There is then very little danger of gas, even if the stove is a poor one. The ashes should never accumulate in the ash-pan until they reach the grate. If this happens even once the grate will usually be burned out. Always run the range so that you can get all the heat needed without having the top red hot, as this will warp the covers and centres, and if a little water should happen to fall on the stove while so hot, the top of the range is very apt to crack. Keep the stove well blacked; if the lids get covered with grease turn them over and let the top of the lid come next the fire until the grate is all burned off. If the covers are red and the blackening does not adhere, let them get wet, so that they will rust a little, and then black them. When buying a range, buy one that is moderately heavy and made of the best quality of iron. All the joints of a heating stove or range should fit well; because if they do not when the range has been used a short time you will notice gas escaping, and will not be able to tell where it comes from.

### Hot Water.

WHERE IT IS INVALUABLE AS A SIMPE REMEDY FOR HUMAN ILLS.

A strip of flannel or a napkin folded lengthwise and dipped in hot water and wrung out and then applied around the neck of a child that has the croup, will usually bring relief in ten minutes. A towel folded several times and dipped in hot water and quickly wrung out and applied over the toothache or neuralgia will generally afford prompt relief. This treatment for colic works like magic. There is nothing that so promptly cuts short a congestion of the lungs, sore throat or rheumatism as hot water when applied promptly and thoroughly. Tepid water acts promptly as an emetic, and hot water taken freely half an hour before bed time is the best cathartic possible in case of constipation, while it has a most soothing effect upon the stomach and bowels. This treatment continued a few months, with proper attention to diet, will cure any curable case of dyspepsia. Headache almost always yields to the simultaneous application of hot water to the feet and the back of the neck.

| 7 brls mackerel | 84 |
| | $4587 |

ADVICE TO MOTHERS.—Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, regulates the bowels, and is the best known remedy for diarrhœa, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind. mar17 eod & wky

# Why the Columbus Watch is the Best

THE Main Spring barrel is completely covered, making the watch perfectly dust proof.

There can be no interference between the Balance and the Barrel.

The Regulator is nearly double the length of others, rendering accurate regulation a very simple matter.

To replace a broken Main Spring, the Barrel can be removed without disturbing the Balance or interfering with the regulation.

The pins of the Regulator are so formed and located that two or more coils of the Hair Spring cannot catch between the Pins and cause the Watch to stop or gain time at an unusual rate.

The Balance comes under the round, or edge, the strongest part of the case, not as with all others, under the center and weakest part.

The Main Spring Power is the lightest used in American Watches.

The calculation of the Train is such that this Watch runs 8 to 10 hours longer than others, with one winding, giving more uniform power and rate.

These are improvements that cannot be claimed by any other manufacturers, and once seen, all must agree with us in saying that this is the strongest and best Watch made; and with all the above improvements, the Columbus Watches cost no more than others.

G. H. TAYLOR,
Jeweler, Charlottetown, P. E. Island.

The premises are centrally situated, commanding a splendid view of Colville Bay, and are within three minutes walk of the Railway Station.

Immediate possession given.

Terms moderate and made known on application to

C. C. CARLTON.

Souris, July 30, 1887.—tf

# TAMARAC

Alderman R. E. Elbeck, Kingston, Ont., says: "Tamarac Elixir" is the best medicine on earth for Coughs and Colds. In my own case it produced rapid and gratifying results. I caught a severe cold which it seemed impossible to break up, but continually became more thoroughly seated. Finally a hacking cough set in which troubled me day and night, causing soreness of the Lungs. Hearing your "Tamarac" highly recommended, I procured a bottle. The first dose eased the cough, and one bottle completely cured me. It is a splendid preparation, pleasant to the taste, and should be kept in every house.
