More Than Mere Transportation

The kind of people who own an Overland require more than mere transportation. They require comfortable riding. They require a good looking car. They require lasting economy.

In the Overland you are sure of these things. Ask any of the thousands of Overland owners you meet. We know these answer.

When you ride on Overland Triplex Springs over rough roads, you notice immediately the smooth riding qualities of this exceptional car. Every mile is comfortable.

You save money on Overland's low upkeep. For a week's driving of 100 miles, the average running cost is no more than \$1.00 including gas, oil, tires and incidentals. Owners report upwards of 26 miles to the gallon and from 6,500 to 10,000 miles per set of tires.

Overland is the outstanding automobile investment—low in first cost, low in upkeep, low in depreciation. Call or phone for a demonstration ride.

Notes By The Way

(Continued from Page 4) as in summer. Midgell and St. Peeters Bay were to be made to look like thirty cents, and its supply of fertilizer to be but as a trickling rivulet when compared with Richmond Bay and the wealth that would flow therefrom to enrich and beautify this province summer and winter. Mussel mud was to be first, last and all the time available. Not zero temperature or winter storms any more than summer breezes should hinder the operation of the plant and the spur-line or the outflow of richness from Richmond Bay to the farmers' fields.

Richmond! Truly a happy name as well as an historic one, its significance derived from two languages, with the obvious meaning Rich World. Prince Edward Island to be made rich from Richmond Bay and then to enrich the world—such may have been the thought in the mind of the author of the manifesto when he penned it and set the glowing picture before the farmers of Prince Edward Island, a picture of wealth and prosperity at all seasons of the year. Wealth and prosperity from Mussel Mud was a principal slogan of the platform of 1919. The picture in its every line of form and coloring shrieks of Mussel Mud!

That was three years ago. But where are the crops that should now be growing from the Mussel Mud of Richmond Bay? Where is

Always—the same in QUALITY the same in RESULTS

AFTER friends have complimented you on the lightness of your Bread and the delicious flakiness of your Pies, have you ever stopped to think why your baking always turns out right when you use

OGILVIE'S ROYAL HOUSEHOLD FLOUR

One of the reasons for this unvarying excellence is because the finest wheat in the world is the only kind good enough to use for "ROYAL HOUSEHOLD."

This is specially selected hard Manitoba wheat. Our experts obtain the cream of the wheat crop direct from the grain growers through our chain of elevators which cover the West.

Throughout its trip of transformation from wheat to flour, every stage of the process of milling OGILVIE'S "ROYAL HOUSEHOLD" FLOUR is tested along accurate, scientific lines.

OGILVIE'S "ROYAL HOUSEHOLD" FLOUR has always the same excellent Qualities and Bread-and-Cake-making virtues.

Experienced housewives all say: "The Baking Always Turns Out Right When I Use Ogilvie's "Royal Household" Flour."

Always order it using the full name—Ogilvie's "Royal Household" Flour.

East or West—Eddy's Best—since 1851!

"Here's an Eddy - 40 years old!"

In an old shack near the Mattawa River, these matches—a relic of the old match-making days, a box of Eddy's matches made over forty years ago at Hull—were found last Autumn!

They had weathered the extremes of our Canadian climate, the heat and cold, the sleet, snow and rain for forty years.

It was an old sulphur match—the "Telegraph" Brand—the last word in matches at that time—a great match in its day.

Longer than Eddy's make to-day, it was wasteful. Still, it was a light, and a good one.

The most incredible thing
