ENGINEER GRAHAM.

Of Montreal, Cured of Diabetes by Dodd's Kidney Pills.

MONTREAL, Aug. 6.—Proof positive and convincing has been already given in Montreal, that Dodd's Kidney Pills are the only sure cure for that dread disease Diabetes. And day after day fresh evidence comes to light, to make the proof more emphatic and convincing.

Engineer James Graham, 50 Victoria Square, says:—"I suffered with Diabetes for six years. One of the best doctors told me I could not be cured.

"I read of Dodd's Kidney Pills and decided to try them. Three boxes made me well, and I have not suffered from Diabetes since."

Such cures as this prove the efficacy of Dodd's Kidney Pills.

Alas 'tis true beyond a doubt,
Our sorrows come together.
There's nothing now to talk about
Excepting war and weather.

What Is Dr. Chase's Nerve Food?

In appearance Dr. Chase's Nerve Food is an oval, chocolate coated pill. In the condensed form it contains all of nature's most strengthening and invigorating tonic and restorative, and for this reason it is unapproachably as a blood builder and nerve restorative. It cures all diseases caused by thin blood and exhausted nerves and makes pale, weak nervous men, women and children strong and healthy. 50 cents a box.

The Portland cement producers of England who are forming a trust, think they will be able to stick together.

Minard's Liniment cures Garget in Cows.

Men lie best, but women deceive best.

DR. A. W. CHASE'S CATARRH CURE... 25c.

is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

Floorwalker—Cutlery? Yes, sir. Go straight down the aisle.
Hunchback (fl ring up)—Does it make any difference to you, sir, whether I go straight or crooked?

Minard's Liniment cures Distemper.

Brown—Your wife seems rather hoarse today.
Jones—Yes, I was very lath home last night.

A Good Stomach.

is essential to health and happiness, but don't blame the stomach for biliousness. It is deranged, and causes poisonous bile to remain in the system causing indigestion, headache and irregular action of the bowels. Dr. Chase's Kidney Pills regulate the liver, kidneys and bowels and by their direct action on these organs effect prompt and lasting cures of biliousness, dyspepsia, headache and all kidney ailments. One pill a dose, 2 cents a box, at all dealers.

It is said that dogs speak with their tails. It is true a short-tailed dog must be a stump speaker.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All ailments return the money it fails to cure. Dr. W. C. Groves's signature is on each box.

Spain has more sunshine than any country in Europe. The average is 3,000 hours.

Minard's Liniment cures Colds, etc.

The largest hotel in the world, with a capacity of 5,000 guests, is being built at Mecca, by order of the Sultan.

Minard's Liniment cures Diphtheria.

Mrs. West—My husband is the most careful man with his clothes I ever knew.

Mrs. East—Indeed.

Mrs. West—Yes; why, you couldn't get him to carve a duck without putting on his overalls.

When It Hurts to Cough.

The cough that hurts, the cough that gets tight in the chest, is daily getting deeper and deeper into the bronchial tubes and is making directly for the lungs, to become pneumonia, inflammation of the lungs or consumption. Such coughs yield only to the wonderful efficiency of Dr. Chase's Syrup of Linc 1 and Turpentine which loosens the tightness and cures cough and cold together. 25 cents a bottle. Family size 60 cents, sold everywhere.

Excursions to Pictou

The most pleasant way of Spending a hot day.

Return Tickets good for day of issue, will be sold on steamer

"PRINCESS"

for one dollar and fifty cents each. Fare will include Tea on return voyage.

Steamer leaves half past nine local Returns about nine in the evening.

By order

FEEDING FOR POULTRY MEAT.

A STATEMENT OF THE RESULTS OF THE POULTRY FATTENING STATIONS CONDUCTED BY PROF. J. W. ROBERTSON, DOMINION COMMISSIONER OF AGRICULTURE AND DAIRYING.

A copy of the evidence upon poultry fattening given by Professor Robertson before the Agricultural Committee of the House of Commons is to hand. It will be remembered that lots of chickens were fattened in the Maritime Provinces as follows: At Truro and Wolfville, N. S., Andover and Sussex, N. B., and at Charlottetown and Summerside, P. E. I. Referring to the work at these stations Professor Robertson in his evidence said:

1. The crates in which the fattening is carried on are six and a half (6½) feet long by sixteen (16) inches square, inside measurement. Each crate is divided into three compartments, and each compartment holds four or five chickens according to their size. The crates are made of slats running longwise on three sides and up and down in front. The slats may be from 1 inch to 1½ inches wide by ½ inch thick. The spaces between the slats in front should be 2 inches wide to permit the chickens to get their heads through for feeding. The slats on the bottom should be put on ¾ of an inch apart. Each compartment has a small sliding door in front.

2. The crates are placed on stands about 2½ or 3 feet from the ground. The droppings from the chickens in the crates are received on sand or some absorbent material below.

3. A light "V" trough, 2½ inches inside, is placed in front of each crate, running the whole length of it. The bottom of the trough is about level with the floor slats of the crate.

4. The birds of the larger breeds are best suited for fattening. Dorkings and Plymouth Rocks are good sorts, also light Brahmas and Buff Cochins or crosses of these. The age may be anywhere from three to four or even five months, and the condition of the bird should be such as to indicate healthfulness and a tendency to fatten.

5. The feed may be oats, barley or wheat, preferably oats ground very fine, as fine as they can be pulverized, the seeds and hulls being kept in and also thoroughly pulverized.

6. The ground grain should be mixed with skim milk only. The skim milk may be sweet or sour, preferably sour. The mixture should have about the consistency of thin porridge; so thick that it will not run readily and so thin that if a large spoonful of it were put on a plate it would spread.

7. The chickens should be fed from the trough in front of the crates three times a day. During the first three or four days they should be fed quite sparingly, as much as they will eat up clean, thrice a day. They should be given water thrice a day and an allowance of grit twice a week. Ground oyster shells are suitable.

8. When the chickens are first put in, it is a good plan to rub a little sul-

phur close under both wings over a spot of about 1-2 inches in size, and over a similar surface of the skin under the tail. That treatment will kill lice.

9. It is desirable to have the chickens fed in the crates from the troughs for about two weeks. They should be fed lightly for the first week, and after that, they may be fed as much as they will eat up clean, thrice a day. Then they may be fed by the cramming machine. When it is used they should be fed twice a day only, and the feeding period with the cramming machine should not be longer than two weeks.

10. During the last ten days of the fattening period a small portion of tallow should be used at the rate of one pound per day for about 90 or 100 chickens, according to size. That should be gradually increased until one pound per day is being fed to from 50 to 70 chickens. The best way to mix the tallow is to melt a portion of it, thicken it while still hot with ground meal, and then mix the right quantity of that paste with the other feed for the day.

11. The cramming machine is a pail-like hopper, standing on three legs about 4-2 feet high, with a small force pump at the bottom leading to an opening, on which is placed a rubber tube about ten inches long and 3-8 of an inch diameter inside. The rubber tube is about 3-2 feet, or the height of the feeders waist, from the ground. The feeder takes the bird by the legs and holds it against his body, partly under the right arm. He then opens his beak with his left hand and puts it over the rubber tube. The left hand carries the head forward, the neck of the bird being kept straight by drawing it slightly back by the right hand, which is around its body, with the fingers over its crop. The rubber tube being wetted with milk, readily slides into the bird's crop. By pushing the pedal with the foot, a sufficient quantity of the feed is caused to pass into the crop. The pedal is let up, and all pressure of food into the crop is removed before the bird is pulled back. If that is not done, some of the food will be excluded into the throat and that might cause choking. The operation is quite simple and does not seem to be in any way harmful or even disagreeable to the chickens.

Following is a statement of the birds fed, food consumed, and gains in flesh and cost at Charlottetown:

	1st Lot.	2nd Lot.
Number of chickens	241	216
Cost	\$60.25	\$54.00
Cost per chicken put in coops	25 cts	25 cts
Grain consumed	1,749 lbs	1,685 lbs
Skim milk consumed	1,966 lbs	1,676 lbs
Total gain in weight	246 lbs	237 lbs
Average gain in weight per chicken	1 lb	1 1/8 lbs
Feed consumed per lb of gain in weight	7 1/2 lbs	7 0 lbs
Skim milk per lb of gain in weight	8 1/8 lbs	7 0 lbs
Cost of feed per lb of gain in weight	10 cts	10 cts
Sold per pair in England		\$1.27

The first lot of the above were shipped per SS. Lake Huron. Cold storage was not maintained on the steamer

as agreed by the agents. The chickens were spoiled and they were charged to the agents of the steamer, who, of course, agreed to pay for them.

Of second lot, sold by J. and W. J. Courtenay, London: 84 chickens at 2 shillings and 8½ pence each.

Sold by James Riddin, Liverpool: 106 chickens at 8 pence per pound.

The commissioner then went on to say:

On the whole it may be concluded from our observations on the fattening that:

1. Chickens of the smaller breeds, such as White and Black Spanish, Minorcas, Andalusians and others of that sort, do not give as good returns in the fattening as chickens from the larger breeds, such as Plymouth Rocks, Wyandottes, Brahmas, Indian Games, Dorkings and crosses of these.

2. Oats or other grain must be ground very fine, practically pulverized.

3. As a rule it is not profitable to fatten for a longer period than four weeks.

4. The use of the cramming machine is not necessary, but by means of it the chickens show a larger gain in weight for the quantity of feed consumed during the last ten days of the fattening period than when fed altogether for the trough.

5. All the directions for the guidance of feeders as given above should be carried out in every detail.

Nervous Debility.

A Sufferer From Weak Blood and Exhausted Nerves Tells of His Cure by Using Dr. Chase's Nerve Food.

Mr. A. T. P. Lalame, railway agent at Clarenceville, Que., writes:—"For twelve years I have been run down with nervous debility. I suffered much, and consulted doctors, and used medicines in vain. Some months ago I heard of Dr. Chase's Nerve Food, used two boxes, and my health improved so rapidly that I ordered twelve more. "I can say, frankly, that this treatment has no equal in the medical world. While using Dr. Chase's Nerve Food I could feel my system being built up until now I am strong and healthy. I cannot recommend it too highly for weak, nervous people."

Dr. Chase's Nerve Food is a tonic and restorative of inestimable worth. It makes the blood rich, the nerves strong, increases the weight, and cures all weaknesses and diseases of the nerves and blood. In pill form, 50 cents a box, at all dealers, or Edmondson, Bates and Co., Toronto.
