GRAIN

WINNIPEG, Jan. 29— (CP) — Broad advances were made in all commodities today on the Winnipeg Grain Exchange in response to strength on United States markets.

July oats and all rye futures reached new seasonal highs, while July barley equalled the previous high.

Good commercial demand, including good buying for American accounts, appeared in both oats and barley. Eastern crushers made purchases of flax, while rye was mostly local trade.

Export loadings included 360,000 bushels of Canadian wheat for India; 225,000 bushels for the United Kingdom; 265,000 bushels for Belgium; and 70,000 for Switzerland.

I. W. A. prices were unchanged from Saturday; class two prices were up two cents.

ATTENTION POULTRYMEN

Have you carefully considered what you are going to buy in Baby Chicks this season. We would like to state a few reasons why you can order our Chicks with confidence. Government records state the average production for Canadian hens is 120 eggs per bird. Our three-year average for Rocks is 218 eggs per bird for every bird entered in R. O. P. During the past season we have shipped Chicks and Hatching Eggs to several Canadian Provinces and in every case have received repeat orders. One of the largest hatchery owners in Ontario states: "I am more than satisfied with the New Hampshire stock I received from you last Spring—they are outstanding in production and body type."

Many of our customers report 80% production from cross bred pullets from these two purified strains of Rocks and New Hampshires.

Owing to having large pullet orders in February we are offering reduced prices on large orders of Cockerel Chicks till March 1st.

The fact that our Barred Rocks and New Hampshires took top honors at Charlottetown Provincial Exhibition the past three years, winning every first prize in Rocks in 1949 and every first in New Hampshires in 1950 is an assurance of birds of fast growth and good body type.

All chicks sold are from our own flocks that have been pullorum free for ten years, and a very important factor our Rocks and New Hampshires have been closed flocks for years, which produce hardier chicks than mixed strains.

BUTCHERING YOUR WOODLOTS

Young trees are the wage-earners of tomorrow. Why not replace the usual indiscriminate cutting for immediate gain with a selective system on a sustained yield basis.

You would not only have a regular annual income but would also be aiding our main industry—Agriculture, because trees hold moisture and prevent soil erosion. They also protect wild life and provide recreational facilities.
