Charlottetown, April 6, 1895—246 & wy

THE ARMENIAN OUTRAGES.

An Armenian agitation has been started in Berlin, and efforts are being made to open a public purse for the benefits of Christians in Asia Minor. The results are very meagre. The stories of blood curdling outrages as published week in and week out by the British press are accepted only with a large quantity of salt in Germany. London newspapers, which are the sole source of information at present, are supposed to be manipulating the Armenian news to suit England's political aims, most notably to strip up Europe against the Porte. While not denying that some outrages may have occurred, the German editors agree that judgment should be suspended. They also warn the Government to watch closely the British game which they suspect is to co-operate with Russia or to please her by bullying the Porte independently. The Munich Allegemein Zeitung has published an article by Osman Bey, a conspicuous Turkish official, who wished to lay before the German public the Porte's views of the Armenian trouble. Osman Bey blames the Anglo-Armenian committee in London for fostering revolution in Armenia and inciting both Turks and Armenians to atrocities merely for the purpose of making political capital.

CHINA AND JAPAN.

The treaty of peace between China and Japan secures to Japan entire freedom in the importation into China of steam engines and machinery for manufactures, and the same privileges are accorded to other countries in this matter. The latter also grants to Japan extra territorial rights, where, in the matters of tariff and the dispensation of justice, Japan reserves every privilege. The indemnity is payable in seven year installments at 5 per cent interest. Payment of the obligation within three years cancels the interest.

In additional to these provisions China engages not to punish returned prisoners nor to inflict punishment upon Chinese who may have furnished supplies to the Japanese army and navy. China also binds herself to return Japanese prisoners unconditionally. The exchange of ratifications of the treaty will take place at Chee Foo not later than May 8.

Well-informed circles at St. Petersburg consider it inevitable that the European powers should revise the terms of peace arrived at between China and Japan.

Russia, it is understood, is particularly determined upon taking this step, as the contemplated cession of Chinese territory involves danger to her interests in the Far East.

ANSWER TO MOODY'S PRAYER.

A storm, accompanied by torrents of rain, burst over Fort Worth, Texas, on Sunday night, while Evangelist Moody was holding service in the Tabernacle before an audience of 10,000 people. The immense congregation had just joined in singing a hymn when a crackling noise was heard and then the roof sank and the rafters gave way and heavy timbers, and boards covered with tar and gravel came down on a portion of the congregation. There was an immediate panic. Scores of women fainted, men lost their reason and piled pell mell over those near them. Mr. Moody grasped the situation, and walking to the middle of the platform, he lifted both hands to heaven, moving his arms slowly to and fro. This attitude stopped the panic and men began to work to rescue those in danger. The wounded were soon taken out and carried to the homes or houses near by. Sixty were injured. Mr. Moody, at previous services, had fervently prayed for rain for Fort Worth and other drought stricken portions of Texas, and had just returned thanks after announcing that word had been received from several points stating that rain had fallen when the storm reached Forth Worth.

GIRLS SHOULD LEARN

That one hundred cents make a dollar.

How to arrange the parlor and library.

To say "no," and mean it, or "yes," and stick to it.

How to wear a calico dress, and do it like a queen.

How to sew on buttons, darn stockings and mend gloves.

To dress for comfort and health as well as appearance.

To make the sleeping room the neatest room in the house.

That tight lacing is uncomely, as well as very injurious to the health.

How to cultivate flowers and make and keep the kitchen garden.

To regard morals and habits, and not money, in selecting their associates.

To observe the old rule: "A place for everything and everything in its place."

The important truism, that the more they live within their income, the more they will save, and the further they will get away from the poor house.

NEWS NOTES.

Mrs Shortis, mother of the Valleyfield murderer, arrived at Montreal from Ireland on Monday. She visited her son, confined in jail awaiting trial. The meeting between mother and son was truly pathetic, and before it ended the latter showed signs, for the first time since the terrible tragedy, of being visibly affected.

They have dispensed with moral tributes at the opera in New York. Last Tuesday night two plush-lined cases were passed up over the footlights containing silver wreaths of laurel, one for Jean and the other for Edouard de Roszke. As flowers are quoted nowadays, however, silver wreaths are scarcely more extravagant.

A despatch to the Patriot says that Mr. H. P. Duchemin carried off the Governor-General's gold medal at Dalhousie College and graduated with high honors in classics. Mr. Duchemin is a son of Mr. Albert Duchemin, of Charlottetown, and has always been an exceptionally clever student. We understand that he will not return home this spring, having accepted a position as teacher in the Normal School at Truro.

PECULIAR in combination, proportion and preparation of ingredients, Hood's Sarsaparilla possesses great curative value. You should TRY IT.

Experience Has Proved It

A triumph in medicine was achieved when experience proved that Scott's Emulsion would not only stop the progress of Pulmonary Consumption, but by its continued use, health and vigor could be fully restored.

Parkside, 9280, race record 2 22 3-4, will be at his stables, two doors east of J. H. Myrick & Co's. Fish Market, Charlottetown, during the season of 1895, in charge of Mr. William Bateman who has full power to transact any business in connection with the horse. Call and see him

april 6 tue thur sat.

VICTORIEN SARDOU

The Great Dramatist.

The mobile features of this great man are seen above. Sardou is the great wizard of the stage, clothing his characters in flesh and blood, and making them live. He makes, not mummies, but men and women, as witness the realistic portrayals of Bernhardt,—chiefly the master's thought. When body and brain are weary with work, anything that will drive away the blues must possess a great value. It is the verdict of Sardou that "Vin Mariani," the great tonic-stimulant, possesses this subtle power. This is what the great man says: "Vin Mariani' is perfect, gives health, drives away the blues, and is of such excellent quality that whoever tastes it might almost desire to be forever debilitated and depressed, thus to have a pretext to drink it." Celebrated men and women, the world over, have spoken similarly of the stimulating, nourishing effects of "Vin Mariani" upon body and brain. A preparation from pure grapes and carefully selected coca leaves, "Vin Mariani" is more tonic than quinine, and yet it never constipates. For the convalescent it is invaluable; for all enfeebled people, it has a magic restorative property. Send your name to Lawrence A. Wilson & Co., Montreal, the Canadian Agents, and you will receive an album containing the portraits of a large number of celebrated people, who have used "Vin Mariani" with wonderful results, and who speak highly of it.

EFFECT OF THE FRENCH TREATY. WINES AT HALF PRICE.

The Bordeaux Claret Company, established at Montreal in view of the French Treaty, are now offering the Canadian connoisseur beautiful wines at $3.00 and $4.00 per case of 12 large quart bottles. These are equal to any $5.00 and $8.00 wines sold on their label. Every swell hotel and club are now handling them, and they are recommended by the best physicians as being perfectly pure and highly adapted for invalid use. Address, Bordeaux Claret Company, 30 Hospital Street, Montreal.

MONEY LOST

Good Photographs.

A fine lot of Photos, taken by MR. C. LEWIS, were laid on our table a few days days ago. Those Photos are of gentlemen who attended the funeral of the late Sir John Thompson at Halifax—Lieutenant-Governor Howlan, Bishop McDonald, Dr. Doyle, and many others. They are to be put in the large picture, which is to be painted at Toronto, of the interior of the Church, representing the funeral. Mr. Lewis has the best fitted Gallery in the Province; the arrangements of light are correct; he uses the Dallmyr Lens, which is free from distortion. All work first class; prices very reasonable.

POWER FROM HEAT EXPANSION.

A Motor of Springs and Strings Operated by a Gas Jet.

The motor shown below is operated entirely by the expansion and contraction of metal by the direct application of heat. The bands shown are so connected with springs that when one band is expanded it releases its hold on the springs while the other band is receiving the full pressure of the springs. "Pyrono," says The Scientific American, is the name given this motor by its inventor, Dr. W. W. French, of Fort Branch, Ind. The engraving represents a sectional side elevation of the motor, a loosely rotating wheel having an exterior expanding and contracting rim preferably made by sets of metal ic bands arranged one alongside the other.

The bands are subjected to the heat from gas burners which open into a hood on one side of the wheel, and the ends of each band pass over pulleys journaled in suitable bearings in the sides or spid rs of the wheel, the two sets of bands passing over corresponding sets of alternately arranged pulleys. The ends of the bands, after passing over the pulleys, connect with links in the middle of the outer leaves of elliptical springs, the springs being attached, at the middle of their inner leaves, to rods secured in the sides of the wheel. The several bands are supported intermediate of their pulleys on posts, and the bands are connected at their middle by inwardly extending links, with levers fulcrumed in the sides of the wheel.

Each link has a turn buckle, whereby the length of the link may be increased or diminished, and the levers are connected by other links with a disk on a crank arm on the shaft. The bands on each set connect at their ends with the same springs, and they connect by independent links with separate levers opposite each other and connected with opposite sides of the disk on the shaft. As a band is heated from the burner, its expansion releases a set of springs, whose closing power is exerted on the ends of another band, and through the two links and lever a pull is exerted on the disk to cause the wheel to rotate in the direction of the arrow. A similar operation takes place with the other bands. The motor is designed to be self-governing, the springs establishing a yielding connection between the bands and levers, to prevent the band from breaking and take up slack until the running temperature is reached.

DOUBLE-DASHER CHURN.

They May be Operated Together or Separately.

The two dashers with which this churn is provided, one having a vertical and the other a rotary movement may be operated together or either dasher may be used independent of the other. It has been patented recently. The body of the churn has exterior pins on opposite sides, each pin adapted to enter an angular slot in one of the side standards, and the cover is made in two sections, flanged to fit over the upper edge of the body. In the upper ends of the standards is journaled a shaft adapted to be operated by a belt from a band wheel, the shaft having a crank arm, and a bevled gear being adjustably secured on it, the latter meshing with a similar gear on the upper end of a vertical shaft on whose lower end is secured the hub of a rotary dasher.

Plates of somewhat diamond shape extend diagonally from the hub, the plates being adapted to agitate the milk at the bottom of the churn body. Sliding upon the vertical shaft is a sleeve upon which are located two apertured disks, constituting the vertical dasher, to which movement is communicated by means of a link connecting the upper end of the sleeve with the crank portion of the driving shaft at the top. By simply disconnecting the upper end of the link from the crank the movement of the vertical dasher ceases, and a slight lateral movement of the driving shaft disconnects the bevel gears through which the rotary shaft is operated, both movements being thus readily controlled by the operator for the use of both dashers together or either one separately, as may be desired.

Soda Propelled Engines.

A fireless locomotive engine was recently used on the Aix-la-Chapelle Julich Railway. The motor power is derived from soda. The invention is based on the principle that solutions of caustic soda, which have high boiling points, liberate heat while absorbing steam. These engines eject neither smoke nor steam and work noiselessly. Compared with coal-burning locomotives, soda engines show a capacity equal to the former, while they are worked with greater ease and simplicity.

Barber or Bootblack.

"Beg pardon," said the garrulous passenger, "but I think I heard you addressed as professor. Might I enquire what chair you hold?"

"The chair right next to the door," answered the professor. "I run a shop of my own."—Indianapolis Journal.

How to Get a "Sunlight" Book.

Send 12 "Sunlight" soap wrappers to Lever Bros., Ltd., 43 Scott St., Toronto, who will send post-paid a paper-bound book 160 pages. For 6 "Life buoy" Carbolic Soap wrappers, a similar book will be sent. This is a splendid opportunity to obtain good reading. Send your name and address written carefully. Remember "Sunlight" sells at 6 cts. per twin-bar, and "Lifebuoy" at 10 cts. One cent postage will bring your wrappers by leaving the ends open. sat&wk.

Mrs. Lease, the Kansas woman suffragist, who has a seat in the legislature, has fallen upon evil ways. In the investigation before the State Board of Charities one of the witnesses testified that Mrs. Lease actually swore on one occasion, applying to an official the vigorous and opprobrious epithet of "devilish old reprobate." This is simply awful, and shows the debasing influence of much familiarity with the wicked affairs of the world.

"If You Should Die To-Night."

Well, it would be your own fault, if it was consumption that took you off, and you refused to take Miller's Emulsion of Cod Liver Oil, which has been pronounced by scientists to be a positive cure for that dread disease. If you have any lung trouble, if you are threatened with consumption, lose not an hour in obtaining a supply of Miller's Emulsion of Cod Liver Oil. It is the great blood maker, and blood is what is needed by the consumptive. Miller's Emulsion is the great nerve strengthener and blood maker, and cures Coughs, Colds, Bronchitis, Scrofula and all Lung affections. In Big Bottles 50c. and $1, at all Drug Stores.

TOOTHACHE!

This is addressed to all those who are suffering from Toothache, or who may require treatment of any kind at the hands of a Dentist. I make the very best Teeth, guaranteed, for $5 a set. If not satisfactory, money refunded. Gold and Silver Fillings a specialty. The following letter from Dr. Robertson, of Crapaud, as regards the PAINLESS EXTRACTION of Teeth, speaks for itself:—

To J E McDonald, D D S, Summerside, P E

Dear Doctor,—I am so well pleased with the work you have done for me, that I will take it as a special favor if you will give publicity to this letter. I positively assert that after an experience extending over twenty-two years under the hands of many dentists, you are the only one who ever extracted a tooth for me ABSOLUTELY WITHOUT PAIN. The TEN teeth you removed for me at one sitting did not hurt a particle, as Mr James Dawson of Tryon, who was present at the operation, heard me testify. The man who invented your method should be knighted.

I am yours, gratefully,
H. W. ROBERTSON, M. D.
Crapaud, Jan. 10, 1895.

J. E. McDONALD, D. D. S.,
apl—1y Summerside.

Grateful—Comforting.

EPPS'S COCOA

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus,

JAMES EPPS & CO., Ltd, Homœopathic Chemists, London England.

The greatest medical authorities and scientists in the world recommend ADAMS' TUTTI FRUTTI for Indigestion. Among them DR. CYRUS EDSON, Health Commissioner, and R. OGDEN DOREMUS, M.D., LL.D.

Allow no imitations to be palmed off on you.

Dairymen, Attention

Of the Cheese and Butter Factories in operation in 1894, we furnished, to the satisfaction of all concerned, the necessary apparatus for the following:—Winsloe, Hampton, Tryon, Crapaud, Grand River, Dunk River, Mount Stewart, and Vernon River Bridge.

In the summer of 1894 we made nine Cheese Vats (each holding from 650 to 700 gallons of milk), and two Butter Vats (each averaging 400 gallons of milk); no complaints were made—satisfaction given.

From our large experience in the past we are now better than ever prepared to meet the wants of Dairymen. We guarantee satisfaction, and respectfully solicit the patronage of those who are contemplating the erection of Cheese or Butter Factories.

Our make of Vats is superior to all others, and our fifteen and twenty gallon Cans are the best and cheapest in the province.

Terms to suit puchasers.

M. STEVENSON.
