INTEREST SHOWN—Keen interest is evidenced in the Red Cross Swimming and Water Safety Classes for advanced swimmers under Mr. Ralph Emery at Summerside.

OFF TO CAMP—The following girls left Summerside on Monday afternoon to spend ten days at Keir Presbyterian camp, French River. Jessie Bingham, Jane Morrison, Myrna Hancock, June Wood, Patsy Preston, Mary Shaw, Barbara Vaughan, Sylvia Bishop, Rhoda Baker, Sylvia Gaudet, Mary Rae Tanton, Shirley MacKay, Maureen Forbes, Irene Mountain, Vera Ross.

ATTENDING CLASSES—More than one hundred members are attending the daily Red Cross Swimming and Water Safety Classes at Tignish under instruction of Mr. Patrick Buote. Mr. Claude Kinch, chairman of the local committee for Tignish has made arrangements for this class and is keenly interested in having competitors from the western part of the Province meet at the Prince County Swim Meet scheduled for August 2nd in Summerside.

ROTARY MEETING—The regular meeting of the Summerside Rotary Club was held in the Olympia restaurant on Monday. There was no guest speaker and the meeting was devoted to business. It was decided that there would be no meeting in Summerside next week and that all their members and their wives would go to Charlottetown to attend the meeting there on Wednesday when the guest of honor will be the president of Rotary International, Mr. Arthur Legueux of Quebec City.

OT AND BARLEY SEEDS SPROUTED AFTER TWENTY YEARS—This spring the local shoemaker of O'Leary, Percy Vey, started to repair an old horse collar which was over twenty years old and he threw out some seeds of barley and oats which were in the neck of the collar, and despite the sweat of the collar and the fact that it was used in all sorts of weather, the seeds grew. On Monday, July 17th this correspondent was shown by Mr. Vey the oats and barley stalks which are growing beside his shoe-repairing shop in O'Leary. One barley stalk was picked and there were twenty-two kernels of barley on it. Pretty good for seeds over 20 years old.

Reports Better Crop Prospects

OTTAWA, July 18 (CP)—Crop prospects on the Prairie Provinces have shown "marked improvement" as a result of heavy rains over the last week, the Bureau of Statistics reported today in a periodic summary of crop conditions across Canada.

The Bureau said cool weather, averaging more than five degrees below normal, has prevailed in all three Prairie Provinces during the last week and warm, drier weather now would be welcome in most areas to promote crop development.

Haying operations are under way in the Maritime Provinces. Wet weather has retarded operations in Nova Scotia and New Brunswick while ideal weather conditions have prevailed over Prince Edward Island during the last two weeks. The strawberry harvest is completed in all provinces, with crops below average in all areas except in Annapolis Valley of Nova Scotia.

Consider Harnessing Of Tides Proposals

OTTAWA, July 18 (CP)—The international joint commission tomorrow will consider proposals for harnessing of tides in passing a resolution on the subject. The commission reports directly to the governments of Canada and the United States and it is up to the two governments to make any announcements they see fit. Both the Canadian and American sections of the board opened a two-day session today. Major harnessing of the tides is a discussion of long-range plans to control the Red River and prevent recurrence of the disastrous floods which caused millions of dollars damage recently in Winnipeg and other parts of Manitoba.

Construction Work On Prince County Hospital Proceeding Satisfactorily

Construction work on the new Prince County Hospital is proceeding satisfactorily and it is expected that the building will be completed early in 1951. At the present time the plastering is about half done. The plumbing and heating is pretty well along with the exception of the boiler room. The heating unit, which is oil burning, is on order and is the same type recently installed in the Charlottetown Hotel. The concrete floors are pretty well completed. All floors except the utility rooms and lavatories are of concrete and will be covered with battleship linoleum. The floors of the utility room and lavatories will be tiled. The elevator is on order but has not yet arrived. There is provision being made for two elevators but only one will be installed at first. This new 118 bed hospital of brick and steel construction is located on Summer Street, north, and is composed of four floors. On the ground floor there will be kitchen, dining room, laundry, morgue, locker rooms, food stor-

Fire Chiefs Asked Expects Renewal Of Wartime Policy To Reduce Fire Loss

OTTAWA, July 18 (CP)—Mulching sod orchards is essential for maintenance of good moisture relationships and for the reduction of competition for moisture and nutrients. Unfortunately a number of growers lost trees due to flash fires in mulched orchards during the very hot and dry period of the past growing season. While in some instances these fires may have been due to no fault of the grower, many can be directly traced to carelessness, or to improper management in mulching the orchard. Serious fires in orchards which have occurred to date, have been in orchards where dry mulch was applied after spring rains and during the hot summer weather when the mulch itself was very dry and ignited readily.

Mulch in sod orchards is essential and its use is strongly recommended. It should, however, be applied in the late fall so that it will be thoroughly wetted down and start decomposition before the chance of fire is serious. This is particularly important if dry mulch is to be used and if the orchards border main highways.

In the majority of orchards it is necessary to use supplementary mulch in order to obtain sufficient depth of mulch. The texture of the orchard soil and the elimination of fire hazards can both be improved by efficient use of the cuttings of the sod in the orchard. Young immature grass is the best mulch and when grass is cut frequently it does not draw as much water during hot dry periods. Grass handled in this manner decreases the risk of flash fires as it decomposes more rapidly and at any one time the amount of dry mulch from these cuttings is at a minimum.

Finally, it should be apparent to any grower with a mulched orchard that extreme care should be taken in the use of matches and cigarettes, particularly during the hot dry periods of the summer months.

Mr. William C. Hill, Quartermaster on M. V. Abegweit, Borden, and Mrs. Hill and little son, Marvin Carroll were visitors to Summerside on Saturday, the guests of his parents, Mr. and Mrs. Robert Hill.

Favorite Leads Amateur Tournery

By W. R. WHEATLEY
Canadian Press Staff Writer
SASKATOON GOLF AND COUNTRY CLUB, July 18 (CP)—It was Nick Westlock again today leading the winners' parade in the second round of the Canadian amateur golf tournament, but practically all those expected to come through did so safely. There was a bit more showmanship and color in today's play. Dr. Bob Reid of Prince Albert came within one good shot of upsetting Guy Owen, a Texan now playing out of Cutbank, Mont., and the only American still in the running. Two brilliant juniors—Laurie Roland of Vancouver and Doug Silverberg of Red Deer, Alta.—went along with the winners. Two Canadian boys likely to play Westlock an argument any day played strong, steady games. This pair, Jerry Kesselring of Kitchener, Ont., and Bill Mawhinney of Vancouver are former Canadian junior champions.

Pete Kelly Wins
A former junior champion, Bob Fair of Toronto, fell before veteran Pete Kelly of Fredericton, missing a birdie on the 18th in an effort to square the match. Another one-up win went to Glen Gray of Edmonton over Pud Carter of Dartmouth, N.S.
