Manager, Office Sup't

## THE DAILY EXAMINER.

SEPTEMBER 13, 1879.

### Partial Election.

We learn that Messrs. Connors, White and Perry were nominated yesterday as candidates to fill the vacancy in the representation of the First District of Prince county.

### Canada Before the World.

(From the London Catholic Record.)

It is not yet forgotten that two illustrious Canadians, the late Sir George Cartier and the Hon. Wm. McDougall were accepted guest at Windsor Castle, in obedience to an invitation of Her Majesty the Queen. It is well known that Queen Victoria took delight in the conversation of the able and genial Canadian Premier, and that the honors of a truly royal hospitality were heaped on him and his honorable colleague.

The Hon. Mr. Langevin has succeeded Sir George Cartier as the leader of the French Canadian section of the Dominion, and England has seen and recognized, once more the ability and perseverance of the Canadian race. A Governor can no more, by that figure of speech which it is well to call a *lapsus linguae*, brand the race as inferior.

In financial circles Sir John Rose worthily represents Canada at the British capital. In case of need the diplomatic help of this eminent financier can well sustain Canadian honor and credit. Neither of these is at a discount. In fact, successive administrations have obtained such loans as were desired. Quite recently Sir Leonard Tilley has at least equalled preceding ministers in this respect. The facility with which he has won a great financial victory, bears witness to his diplomatic skill and the soundness of Canadian credit.

Canadian youth are not less distinguished. Mr. Sidney Hunton, of Ottawa, has just won the Gilchrist scholarship and taken the highest honors in mathematics, at the London University. Nor in the warlike arts Canada behind the world. Col. Gibson has competed successfully for the Prince of Wales' prize of \$500 at Wimbledon. Col. Elliot, son of the late Major J. F. Elliot, of Windsor, Ontario, has merited the cross of St. Michael and St. George. Major Robinson, son of the late distinguished Chief Justice, Sir John Beverly Robinson, and Col. Jarvis, C. M. G., formerly Deputy Adjutant General of Militia at Kingston, are highly honored in England. What shall we say of the many brave Canadians who have distinguished themselves in that disastrous African war! History will not allow their valorous deeds to be forgotten.

Canada is no less loyal than her sons are brave. It cannot be overlooked that when there was danger of war with the great Northern Powers which threatened European civilization, she generously offered a contingent of ten thousand men in aid of the Imperial cause. This, if occasion had required, would have been more than mere show and promise, as is well shown by the conduct of the Canadian regiment which has so long marched side by side with the best of British troops.

As regards the arts of peace Canada right nobly holds her own, as was so grandly proved at the splendid Parisian exhibition as well as at the great Centennial display in Philadelphia. Her trade and enterprise are no less remarkable. Her mercantile navy ranks as the third among the nations that go down to the sea in ships. That such a people should possess a skilled and hardy race of seamen is not to be wondered at. Nor that among these should be found one who is indeed the prince of oarsmen.

Canadian made machines are well spoken of in Australia. The *Free Press*, an Australian paper, in a long review, says:—

All American reaping machines are not manufactured in the United States, as was popularly supposed by farmers some years ago. The IX Combined Reaper and Mower is a Canadian implement, first brought to Australia and shown at the Intercolonial Exhibition, Sydney, 1877, by Mr. William Fleming, who, by the way, has since settled in Sydney as an importer of agricultural implements, at the Canada Depot, Clarence street. Its excellence as an agricultural implement has been demonstrated in the cornfields and hay paddocks of New South Wales; and there are those who do not hesitate to say that it includes the main feature of the invention of the Rev. Patrick Bell.

The Maritime Journal states that Peter's Combination Lock Company is establishing a factory at Moncton, N. B., with a capital of \$200,000. The company intend to manufacture locks of every variety, as well as brass goods and all kinds of builder's hardware. It absorbs a concern of the same name hitherto doing business at Westbury, Connecticut.

### Venor's Weather Predictions.

Henry G. Venor writes to a Montreal paper regarding the weather. The letter will be read with interest on account of the important predictions which it contains. Mr. Venor looks for a protracted summer, which is agreeable information for the general public just now, and especially for the working classes who derive employment from out-door work. He is also of the opinion that we shall not have genuine winter weather until late, but he is not hopeful that the delay will modify its severity or shorten its length. His views on these latter points somewhat blunt the edge of his earlier prediction. We quote his letter entire:—

ST. JOHN.—There are no indications of autumn in this section of the country. The woods are still of a fresh and beautiful green, but few of our birds have left, and several species of these are raising their third clutch. A second edition of mosquitoes and black flies have appeared, the sand midges are as hard at work in their attempts to make us miserable as ever. The general weather is warm, hazy and balmy, although the nights are occasionally pretty sharp. A great deal of grain is out yet, and much has yet to ripen. Altogether it looks as if our summer season was to be protracted, and as if winter was to be, as it were, "shoved off," or out a little of its usual position. The rivers and smaller streams are low, and still falling, notwithstanding the wet summer, and, as there is no chance of these filling again, winter will, in all probability, set in with low water everywhere. The approaching winter of 1879-80, though still distant, looked as though the weather-glass of past experience, appears formidable. They are well defined in locations of severity and lengthy duration when it does set in, but the outline presented to me just now depicts the heaviest snow falls as characterizing chiefly the latter half and end of the winter. Further, it is probable that a severe term will set in abruptly towards the middle of November and continue through a portion of December, with but scant snow falls.

HENRY G. VENDOR.

Rouge, Sept. 1st, 1879.

### The Smith-Morris Race.

THIS single scull contest takes place on Bedford-Basin, Halifax, on Tuesday next. The Halifax Herald says:—

"The interest in the Smith-Morris race, on Bedford Basin, on Tuesday, is increasing. It is felt on all sides that this race will test Smith's powers to the utmost, as Morris is undoubtedly a "hard man to beat." The race at Silver Lake, it will be remembered, was won by Smith by only half a boat length. Since then Morris has greatly improved, and will probably be in better condition for this race than he has ever been in any previous one. Both men are practising—going over the course two or three times a day. Both men are in excellent form, but those who witnessed the race on Silver Lake declare that a great improvement is notable in Morris' stroke. Morris is getting well acquainted with the course, likes it very much and, it is understood, has every confidence in his ability to win. Smith, also, is putting in some fine rowing. He is somewhat better of the severe cold caught while waiting on the float while the stake boats were being fixed during the late race. As far as we can judge, Morris is a far superior man to Wallace Ross, and the contest on Tuesday will undoubtedly be a very close and most exciting one. And it may be as well to state that the best informed of Smith's backers strongly advise their friends not to risk any money on him. It is sincerely hoped that the water will be in good condition, and that the race will come off on the day appointed. There will probably be a much larger number present on Tuesday than witnessed the last race, especially from the country.

### Flour.

A Montreal despatch of the 11th says the flour market is quiet but firm; fall flours are steady; Spring Extras are unduly enhanced because of scarcity; Strong Bakers' are scarce and high. Receipts, 2,000 bbls. The following sales are reported to-day: 200 spring extra, \$4 95; 400 do., \$5; 150 superfine extra, \$5 10; strong bakers', \$5 25; 50 do., \$5 50. The following are the quotations:—

Superfine extra	\$5 05	\$5 10
Extra superfine	0 00	4 95
Spring extra (new ground)	0 00	4 90
Superfine	0 00	4 60
Strong bakers'	5 10	5 25
Fine	4 10	4 15
Middlings	3 25	3 50
Pollards	2 90	3 10
Ontario bags	2 32	2 40
City bags (delivered)	2 50	2 55

As will be seen by advertisement in another column, return tickets will be issued from Point Du Chene to Ottawa for \$18.90, on the 15th and 16th and also on the 19th 20th and 22nd instant.

TRAMPS BURNING BARN IN PICTOU COUNTY.—New Glasgow, Sept. 10.—Last night three barns belonging to Thomas Grant, tanner, Riverton, were totally destroyed by fire. The owner lost all the season's crops, and heavily in farm implements, &c. Total loss fully \$2,000. No insurance. The fire is supposed to have been started by two tramps, who had asked, a few minutes before the flames broke out, for permission to sleep in the barn. They were in the house when the alarm was given.

A CURIOUS fact has just come to light in regard to the prosperity of the iron trade in the United States. In negotiating for the iron work on the extension of the new State, War and Navy department building in Washington, the officers in charge of the work, instead of advertising for bids, addressed circular letters to the prominent iron manufacturers and contractors, requesting them to submit estimates for the iron work. The replies demonstrated the remarkable fact that the majority of the contractors declined to bid for the work on account of the large number of orders ahead.

AN HONOR CONFERRED.—General Sir P. MacDougall conferred an honor on the teachers and scholars of the Inglis Sabbath School, who held their annual picnic Thursday at Hosterman's, by visiting them. Gathering them together he addressed a few cheering words, and hoped to meet them all next year and many years to come, promising to hold them in whatever way he could. He then gave a donation to the Superintendent sufficient to pay for the hire of the grounds. After a few complimentary remarks to the teachers, wishing them every success, he left amid three hearty cheers from a hundred voices. The Superintendent, on behalf of the School, took the opportunity of thanking all who have aided them in giving the children such a treat.

AT THE POINT OF DEATH FROM A CRICKET BALL.—Says the Fredericton Star:—"A woman named Mrs. Wallace, of this city, was in St. John some weeks ago, during the playing of a game of cricket. A little boy, her son, whom she had with her, ran out into the field where the cricketers were playing, and the mother fearing for his safety went after him. She had hardly entered the field, when the ball struck her behind the ear, prostrating her. She came to Fredericton, and is expected to breathe her last every moment from the effects of the blow."

CANADIAN MADE NUTS.—We understand that Mr. George Waring, late of the firm of Waring Bros., Indian town, is adding to his foundry the necessary machinery for making square, hexagon and other nuts for bolts, and expects to be making these goods in a few weeks hence. The machinery has been purchased from the American Bolt Works, of Lowell, Mass., and is understood to be first class in all respects. The new tariff favors the manufacture of these nuts, and Mr. Waring's enterprise is likely to be well rewarded.—Sun.

A TELEGRAM received in St. John, N. B., on Thursday reports the barkentine *Jane Wright* went ashore at Cape Wolf, P. E. Island. She was full of water and there was little hopes of getting her off. The *Jane Wright* was built on the Straight Shore in October, 1872, registered 419 tons, and was formerly owned by Mr. Charles Nevins of Portland, but has lately been managed by Nevins, Walsh & Co., of Liverpool, G. B. She cleared at Richibucto on the 5th inst. with a cargo of deals for Barrow.

MR. THOMAS WHITE, M. P., has written to the Montreal Gazette that the reports regarding the prospects of difficulties with the Indians have been greatly exaggerated, if not purely sensational. He says they are perfectly quiet, and there are no visible signs of disturbance. This is gratifying information, and will set at rest the fears of those who looked forward to the prospect of trouble and perhaps national embroilment.

### Special Notices.

APPLES and ONIONS in very choice order, cheap for prompt cash, at A. McNEILL'S Auction Room. [Sept. 13, 6]
