

Affairs in the Creek Nation," and that he had authority and promised assistance from the Crown of England therefore, he has endeavoured to instigate the Creeks to a breach of the treaty concluded at New York last year, between the United States and that tribe; and has so far succeeded, as to sow great divisions among the Chiefs; he has prevented the running of the divisionary line between the United States and that nation, which was to have been proceeded on the first of October last. Bowles asserts, that General M'Gillivray had deceived the Indians in the treaty—and has raised a jealousy against that chief, in the minds of many of the informed Indians: But M'Gillivray continues firm in his friendship to the United States—has recommended that the line be run according to treaty—and has endeavoured to convince the Creeks, that Bowles is an imposter. The Indians have intreated of the Surveyor and Commissioners to defer running the line till the spring, to pay no attention to what the "lying Captain" (Bowles) has asserted; and assured them the chain of friendship shall continue bright between them and the United States. The jealousy between the two above mentioned rival chiefs will much agitate the Creeks—and the consequence will probably be a civil war—and, perhaps, the destruction of the nation.

Several attempts having lately been made to destroy parts of the city of Philadelphia by fire, the Governor has issued a proclamation, offering 500 dollars for detecting the incendiaries—to which several citizens have added 500 dollars more.

SAVANNAH, FEBRUARY 23.

General Bowles, we are told, besides taking possession of Messieurs Panton, Leslie, and Company's store, took a small fort from the Spaniards. The Governor of East Florida has offered a reward of 2000 dollars for his head.

NEW YORK, APRIL 28.

The following paragraph is copied from the Charleston City Gazette of April 11, dated Savannah, April 5.

"We learn from good authority that General M'Gillivray has returned to the Creek Nation, and that the Indians have very lately given the strongest assurances of their disposition for peace. A great number of them are expected at the Rock Landing the 20th instant."

The same paper contains the following, under the Charleston head:

"We hear from Savannah, that John Habersham, Esquire, has received a letter from the Collector at Saint Mary's, informing, that in consequence of a plan concerted by the American agent and Mr. M'Gillivray, for that purpose, Mr. Bowles has been taken by stratagem, and delivered to the Spaniards."

By a gentleman lately arrived at Philadelphia, we learn that General Bowles, who

has figured some time past as an Indian Chief, is now on his way to visit Old Spain. He had commenced his passage from New Orleans on board a government cutter, attended by a military escort.

It is presumed that he may have some accounts to settle in Spain respecting goods that he has taken from certain stores in Florida, without consent of the owners.

From all this we may now conclude, that M'Gillivray still lives,—and that Bowles will be doomed to a torturing and ignominious death.

CHARLOTTE TOWN, MAY 21.

The Schooner Abigail, Elliot, with passengers from the American states, was unfortunately drove on the bar in coming into New-London harbour during the high wind on Tuesday last, and in the course of the night went to pieces, previous to which, the passengers and crew had been all safely landed.

The Seal Fishing this season, we are rejoiced to hear, has been greatly productive. The two vessels, belonging to the French inhabitants, concerned in this employment have returned with 800 seals. The fishermen allow, that taking one with another, six gallons of oil may be obtained from each seal, which forms an aggregate of 4800 gallons, or a little better than 19 tons—this, at the price of 16 l. per ton, which is, perhaps, a low estimation, will bring to the owners above 300 l.

Saturday last arrived here from New York, with a cargo of bread and flour, the schooner Betsey, Smith, master, after a passage of ten days.

**A PROPHECY.**—Christopher Love is said, in an English paper, to have foretold the American and French Revolutions. But he does not stop here—he further prophesies, 'That God will be known to many in the year 1795. This will produce a great man. The stars will wander, and the moon turn as blood in 1800. Africa, Asia, and America will tremble in 1803. A great earthquake all over the world in 1805. God will be universally known by all—then a general reformation and peace for ever, when the people shall learn war no more. Happy is the man who liveth to see this day.'
