

Bristol and Vicinity

*Miss Mary Rossiter, R. N. employed for the past year and a half as stewardess with Maritime Central Airways, has resigned her position and after a brief holiday with her parents will resume her nursing profession at the Charlottetown Hospital.

Mr. Joseph R. McNina, a regular summer employee on the S.S. Abegweit, has returned to his ship for the coming season after spending the winter months at his home here.

Local subscribers to the Oblate Mission magazine read with interest in its latest issue an article written by Bro. Joseph Kane, O.M.I. Bro. Kane is a native of Morell and wrote the article en route to Rome where he is studying for the priesthood. Bro Kane's article describes a famous Marian Shrine in Marseilles, France, which he visited.

*Miss Rita Sinnott has taken employment as waitress in the restaurant which is being operated by Mr. Gerry McAdam in the absence of his brother Carl who is on sick leave.

Speculation was rampant in this vicinity a few days ago as to the reason why a small airplane was circling Morell Village at an unusually low altitude. Guesses varied from aerial photographers to enemy scouts. The mystery was unraveled a few hours later when it was learned that one of the occupants of the plane was a native resident, currently employed at an aeronautic depot, and who was taking advantage of the routine flight over this area to see the picturesque beauty of her home town from the air and to wave greetings to her parents and other friends here. It was her first flight in the air, and she was thrilled by the experience.

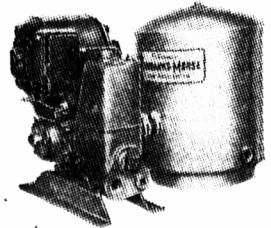

His many friends regret to learn of the passing of Mr. John T. O'Brien, in the Charlottetown Hospital early Saturday morning May 9th after an illness of some five weeks. Known far and wide as Bristol's grand old man, Mr. O'Brien was eighty eight and had spent all his life in this vicinity, with the exception of some years when he followed the high seas in the days of sailing vessels, iron men and wooden ships. A master seaman, he spent practically all his working years around the seaside he loved so well. Mr. O'Brien, was well educated in the old school at St. Peter's Harbor and P.W.C. and in this vicinity he was one who had never to refer to a dictionary for spellings or meanings of words—he had mastered them all. Handicapped with the loss of one hand as a youth in an accident, he fought the battle of life with one hand, raised a large family, most of whom were at his side when the end came. The name and the memory of John T. O'Brien will live long years in this vicinity after his grave has faded with time.

Mr. and Mrs. Joe Campbell and three children arrived here on Monday May 11th from Halifax, N.S., to attend the funeral of Mrs. Campbell's father, the late Mr. O'Brien.

The condition of Mr. Gordon Bonnell, who is a patient in the Charlottetown Hospital was reported as much improved over the week-end of May 10th.

Mr. Ronnie Carter and son Peter were visitors here on Sunday May 10th. Mr. Carter, who had been in poor health for quite some time.

EAST HILL, England, (CP)—Tired of delay in paving their single street, the 60 inhabitants of this Sussex village have purchased

Don't Panic!
it's PANELYTE!

Panelyte table-tops take too and boiling water in their stride—are unharmed by grease, jam, fruit juices, ink, alcohol and cosmetics. A little soapy water and —swish! No mark, no stain! On any surface, Panelyte is your assurance of permanent beauty! Ask your lumber or building materials supplier.

a second hand steamroller to do workers will complete the task by the job themselves. Volunteer late summer.

Wherever big things are going on there you'll find the engineer

WE OF CANADIAN GENERAL ELECTRIC never forget that ours is essentially an engineering organization. We know that our progress depends on the constant recruitment of young engineers and are proud of the contribution we are making to their training.

Engineering graduates join this Company each year
Each year, since its earliest days, engineering graduates have joined this Company to continue their training in special courses—nearly twelve hundred have already gained invaluable experience on the Company's well-known "Test" Course.

The purpose of the Course is primarily to ensure a constant supply of trained talent for this Company. A high proportion of the executives of this organization got their start on the "Test" Course.

The Course over the years has also contributed a constant stream of highly-trained graduates to fill the ranks of Canadian industry. In fact, it is a source of pride that not a few of them are to be found today holding important positions in many widely diversified engineering fields.

Everybody benefits from the engineers' work
Canadian General Electric currently employs some eight hundred engineers—that's one out of every eighteen

employees—and is continually adding to their number. These men—whether they work as development, design, production, application, sales or service engineers, in the electrical, mechanical or chemical fields—are in the final analysis working for you.

They develop, design and manufacture the complex electrical equipment that generates power, transmits it across great distances, controls it and then puts it to work for the common good. They are constantly improving and simplifying existing products to increase their efficiency and lower their cost. They develop brand-new products to meet brand-new needs. In cooperation with our customers' engineers they design and install equipment to meet specialized needs—to raise productivity and to lower costs.

The engineers' part in Canada's rising prosperity

It is an important part of their work to find new methods of manufacture, and to develop new equipment and products that do more, last longer and cost less to operate. It is by employing outstanding engineers—the key men in Canada's progress—that we are able to play a worthy part in our country's industrial growth, and in the developments that are raising the living standards of all of us.
