

The old-fashioned watchman who prowled about the streets of medieval London, with a lantern in his hand to proclaim his coming, and who announced his passage through the streets by shouting "All's well," was a very inefficient protector when compared with the metropolitan police of New York City, commonly known as the "Finest." The modern policeman does not proclaim his coming to the evil doer by shouting or by carrying a lantern. He does his work more quietly and effectively than the old-fashioned town watchman.

It is thus that in all the walks of life and in all occupations, times change and knowledge and efficiency increase. In this respect medical science has kept pace with the advance in other lines. Physicians and chemists have grown rapidly more skillful. There are medicinal preparations now-a-days that cure diseases that were a few years ago considered absolutely incurable. The final triumph in this respect is Dr. Pierce's Golden Medical Discovery. It was first given to the world thirty years ago, and has stood the test ever since that time. It cures 98 per cent. of all cases of consumption, bronchial, throat and kindred affections. Thousands who were hopeless sufferers, and had been given up by the doctors, have testified to its marvelous merits. It is the great blood-maker and flesh-builder. It makes the appetite hearty, the digestion and assimilation perfect, the liver active, the blood pure and rich with the life-giving elements of the food, and the nerves strong and steady. It acts directly on the lungs and air-passages, driving out all impurities and disease germs. An honest dealer will not try to persuade you to take an inferior substitute for the sake of a few pennies added profit.

Dr. Pierce's Pleasant Pellets cure constipation. At all medicine stores.

### HE HAS NO DOUBTS.

Commander Marix Upon the Blowing up of the Maine.

New York, April 5.—Lieutenant Commander Marix, Judge Advocate of the Board of Inquiry into the Maine disaster has resumed his duties as executive officer of the receiving ship Vermont. The Lieutenant Commander, released from the oath of secrecy in relation to the blowing up of the battle ship, had this to say:

"We know that the Maine was blown up by a mine as surely as the physician knows a man was poisoned when he finds him suffering from the effects of poison."

It was suggested that the conclusions of the Board seemed based on circumstantial evidence.

"Surely," exclaimed Lieutenant-Commander Marix, "you have not read carefully the report of the Board or you would not feel a particle of doubt as to how the Maine was destroyed. The evidence was circumstantial, true, in the sense that we did not find any remnant of the mine or find the person whose hand caused the explosion; but it was exclusive."

"The Maine's keel was found blown upward, her plates were blown inward, and nothing on earth except a mine could have produced that result. The effect of the explosion of a mine on a ship is as well known as the effects of poison on the human system.

"The wreck of the Maine was a mute, incontestable evidence of the explosion of a mine, and, after exhausting all available evidence, the Board has so reported."

No sooner was the report of the Board completed and delivered to the President than Lieutenant-Commander Marix asked for a war assignment. He wanted to fight.

### An Important Industry.

In the minds of most people the manufacture of paints and colors is not thought of as much importance, and this branch of business is little understood by the public generally.

Twenty five or thirty years ago, paint was made in a very crude way and consisted mainly of grinding white lead and colors in oil—the mixing, or preparing for use, being done by the consumer.

To-day it is different. This branch of business like all others has made rapid improvements. The best paint is now made ready for the brush. Paint for every purpose can be bought ready to put on.

This change has been brought about by the application of special machinery for the fine grinding and thorough mixing of the different ingredients. This with skilled labor produces paints better and cheaper than under the old method.

Much of the improvement and advancement in paint making is due to the Sherwin-Williams Co., who are without doubt the largest manufacturers of paint in the world. This company has an extensive plant—the largest of the kind in existence—at Cleveland, Ohio. It will give an idea of the extent of their premises when it is stated their floor space exceeds nine acres. Many thousands of gallons of paint ready to use is delivered out every day. Besides the Cleveland plant the Company have their own factories at Chicago and Montreal, Canada, also branch houses at New York and Boston.

The Sherwin-Williams paints are used by the principal railway and steamship companies in the United States and Canada. There is scarcely a town or village in either country where the well known S. W. P. may not be obtained. Fifty travellers are constantly on the road, covering every point of the continent in the interests of the extensive business.

The business was built up from small beginnings and its great success is due largely to the fact that from the start the proprietors have never allowed more than one quality—the best they could make—to go out under their label. The result is, where ever the Sherwin-Williams name is found on a package of paint it stands for the best that there is in paint.

### Agriculture in the English Universities.

A movement is on foot in England to establish an agricultural department in connection with one or two of the leading universities. The only difficulty seems to be to provide sufficient means to finance the scheme. The university senates seem loth to spend any money on the venture but might do so if the venture were to prove successful, and consequently the promoters of the scheme will endeavor to provide the necessary funds from outside the universities for inaugurating the work. The plan is to establish a readership in agriculture at Cambridge and in connection therewith a special examination in agricultural science for the ordinary B. A. degree, analogous to the special examinations in mechanical science and music. Sir Walter Gilbey, a great friend of agriculture, is ready to offer Cambridge University the sum of two thousand pounds to provide a stipend of £200 a year to a reader in agriculture during the next ten years as soon as the promoters are ready to go on with the scheme.

A training of this kind in agricultural science would meet a long-felt want in the great universities of England. It is here that the landlords of the future are educated, and it is of vital importance to the country that they should learn something of the science of agriculture whilst at the university, with the view to the better management of their estates in after life. It is evident from this that agriculture is gradually obtaining its proper place among the advanced sciences in England, and is not looked upon as being beneath contempt, as it is in some of the centres of learning in the new world.

### DAIRY PRODUCE.

Cheese Unchanged—Stock in Liverpool Away Ahead of Last Year's Quality—Butter Firm and Unchanged.

The Montreal Gazette states that cheese continues quiet, and reports certainly do not look promising for any improvement, previous to the opening of the new season. Of late also reports from the country would indicate that there are yet remaining some considerable lots of old cheese in producers' hands, as there have been offers made at points in Ontario, notably in the Peterboro district. Over the cable the chief news today was the intelligence that the official stock on the 1st at Liverpool had been declared at 192,000 boxes. A month ago the stock at that point was 130,000 odd, so that it has decreased 38,000 a month, but it is still away ahead of what it was last year, when there were only 53,000 boxes in Liverpool on the 1st of April. In New York State early cheese has been marketed, and some receivers here expect to have a few hay cheese arrive in the course of eight or ten days. Quotations here continue normal, at a range of 7½ to 7¾.

The butter market continues firm under light receipts, and full prices were again paid for creamery today, selections fetching 22c, while medium to fine realized 21c to 21½c, with undergrade creamery from 18c to 19½c.

### Mr Daniel's Case a Marvelous One.

He Says: "I Feel Like a New Man, Which Condition I Owe to the Blessing of God and Your Paine's Celery Compound."

WELLS & RICHARDSONS Co

DEAR SIR:—I feel constrained, for the benefit of suffering humanity, to add my testimony to the wonderful effects of your Paine's Celery Compound. I was induced to try your Compound through its wonderful effects upon a Mr. Parks. I had previously used a vast quantity of patent and doctors' medicine, only to find myself growing weaker. After using your Paine's Celery Compound to the number of five bottles I gained forty-three and a half pounds, and am able to work hard all day as a mason with comfort to myself.

I feel like a new man, which condition I owe to the blessing of God and your Paine's Celery Compound.

Yours Truly,  
R. W. DANIELS, Lawrencetown, N. S.

### Neuralgia

in the head is almost invariably caused by decayed and abscessed teeth. Don't suffer needlessly when you can be relieved in a few hours and cured in a few days by the careful treatment we will give you.

This Hotel contains about twenty good rooms and shop, all in good repair. Good stabling for thirty horses, with large yard in connection.

Apply to  
**THOMAS CAMPBELL.**  
Queen Street  
81—d&w

### THE PROVISION MARKET.

Lard in Liverpool Advances—Chicago Easier—Local Trade Fair.

Montreal advices state that a fair trade is being done in smoked meats, and packers generally anticipate an increased demand for such next week, as buyers, in most cases, will lay in extra supplies for the Easter trade. We quote as follows:—Canadian pork, \$16 to 16 50 per barrel pure Canadian lard, in pairs, at 8½ to 8¾ and compound refined at 5½ to 5¾ per lb; hams, 11½ to 12; bacon 12c per lb.

The Chicago provision market displayed some weakness today and part of the advance recorded yesterday was lost. Pork closed 5c to 7½c lower, at \$9.47 ½ April, \$9.52 ½ May, \$9.62 ½ July. Lard declined 2½c, closing \$5.02 ½ April, \$5.07 ½ May, \$5.15 July. Short ribs closed \$5.65 April, \$5.05 May, \$5.12 ½ July, \$5.20 September.

Lard in Liverpool was stronger, and prices advanced 3d. Pork closed 5½s 3d; lard, 26s 6d; boneless long cut heavy bacon, 29s; long cut light, 28s 6d; short cut, light, 28s; and tallow 20s 6d.

The stock of provisions in Liverpool declared today were: 16,400 boxes bacon, 7,400 boxes hams, 4,600 boxes shoulders, 58,000 tierces lard, and no pork or beef.

Cash quotations on provisions closed at Chicago:—Mees pork, 9 55 to \$9 60; lard, \$5.05; ribs, sides, \$4.95 to \$5 25; shoulders, 4½ to 4¾c; clear sides, \$5.30 to \$5 40.

Montreal Gazette: Laurierite ministers in the Senate oppose the construction of a railway from Alaska, U. S., into the Yukon country as unpatric. Laurierite ministers in the House of Commons insist on the construction of a railway from Washington, U. S., into the British Columbia country as being patriotic. The line of distinction seems to be drawn round Messrs. MacKenzie and Mann's interests.

W. P. Colwill has opened up a nice Crockery and China store in the building formerly occupied by Miller Bros. 2w d w

**D & A "CREST" CORSETS**

Stand every strain. Always comfortable and absolutely unbreakable, every active woman needs one.

Unrivalled for golfers and bicyclists.

Cost only 25c. more than regular D & A styles, and made in all sizes.

Ask to see them. (s)

## ALMONT WILKES, 2.31½

The well-known stallion, "Almont Wilkes" by "Hernando," 2.37 1-2, dam "Olive Wilkes," 2.39 1-4, dam of "Gracie Wilkes," 2.30 and "Almont Wilkes," 2.31 1-2, by Geo. Wilkes, jr., will stand the season of 1898 at Nicholson's Training Stables, Grafton St., opp. Court House, Ch'town.

Almont Wilkes is a big, stylish, carriage horse; he stands over 16 hands high and weighs 1200 lbs. He is the sire of Montrose, 2.20 3-4, and Westle Wilkes, 2.39 1-4. Montrose was the horse that put up such a gallant fight in the free-for-all at Ch'town track last fall, and there is no doubt that only for the concerted action of the other drivers, he would have won with ease. He trotted 13 heats, winning 4 first places and 5 seconds.

Westle Wilkes started in the 2.40 class at Summerside last fall, a green horse right off the pasture, getting a mark of 2.39 1-4 in a field of seasoned campaigners, and his owner expects him to get a mark of 2.23 this year. This proves that Almont Wilkes sires speed of a high order, and being a remarkable good looker, has always been a prize-winner in the show ring even when up against the best in the land.

For terms and particulars apply to  
J. M. NICHOLSON, OWNER.
