Cigarettes.

Do you care to know how they are made? I think I can enlighten you. An Italian boy, only eight years old, was brought before a justice in New York city as a vagrant. But what did the officer charge him with doing? On a with picking up cigar stumps from the streets and gutters. To prove this, he showed the boy's basket, half full of stumps, water-soaked and covered with mud. "What do you do with them?" asked his Honor. "What do you think was his answer? 'I sell them to a man for ten cents a pound, to be used in making cigarettes.' Not a particularly agreeable piece of information.

In the large cities of America there are a great many "cigar-butt grubbers," as they are called. The name is applied to boys and girls who scour the streets in search of half burnt cigars and stumps, which are dried and then sold, to be used in making cigarettes.

But this isn't all, nor even the worst of it. These cigarettes have been analyzed, and physicians and chemists were surprised to find how much opium is put into them. A tobacco himself says that "the extent to which drugs are used in cigarettes is appalling." "Havana flavoring" for the same purpose is sold everywhere by the thousand barrels. This flavoring is made from the tonka-bean which contains a deadly poison. The wrappings, warranted to be rice paper, are sometimes made of common paper, and sometimes of the filthy scrapings of rag-pickers bleached white with arsenic.

Does cigarette smoking injure the lungs? asked some one of a leading New York physician. For his answer, the doctor lighted a cigarette and inhaled a mouthful of smoke. "Blew it through a corner of his handkerchief which he held tightly over his mouth. A dark brown stain was distinctly visible. "Just such a stain," said the doctor, "is left upon the lungs." The white spots on the tongue and inside the cheeks, called smoker's patches, are thought by Sir Morell Mackenzie to be more common with users of cigarettes than with other smokers.

Several leading physicians in Philadelphia unanimously condemn cigarette smoking as "one of the vilest and most destructive evils that ever befell the youth of any country," declaring that "its direct tendency is a deterioration of the race."

Cases of epilepsy, insanity, and death are frequently reported as the result of smoking cigarettes, while such physicians as Dr. Lewis Sayre, Dr. Kennard and Sir Morell Mackenzie name heart trouble, blindness and other diseases as occasioned by it.

A boy of eleven was made crazy by cigarette smoking, and was taken to an insane asylum in Orange County, New York. He was regarded as a violent and dangerous maniac.

Think of these things, boys, the next time you take up a cigarette, and drop it as you would a coal of fire. The latter would simply burn your fingers; but this burns up your health, good memories, good faculties, good manners and often honesty; and truthfulness as well.

The following from a patient of Dr. Farrell's who was cured of Consumption shows what

**PHOSPHOLEINE!**  
(Pronounced FOS-FO-LEEN).

Dear Sir, will do. Last summer I was troubled with a cough, and my physician says unmistakable symptoms of consumption, including debility and loss of flesh. I lost 30 pounds in weight in a few weeks. My physician, who examined me, advised me to use your Cod Liver Oil Cream with Hypophosphites (PHOSPHOLEINE), and I am happy to be able to inform you that it has produced a complete cure, and I have regained from 124 to 154 pounds in weight, and am now enjoying good health. I drove 65 miles at night across Cape Breton during a snow storm in December without suffering from it in the least.

I am, dear sir, yours faithfully,  
E. R. HARRINGTON.
