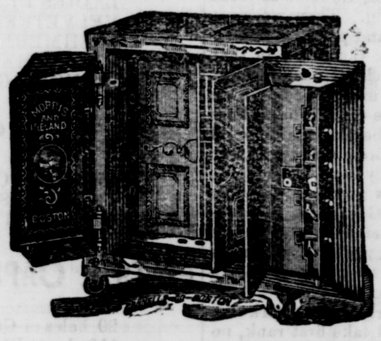
GEO. DAVIES & CO.

Charlottetown, Oct. 16, 1884.

MORRIS & IRELAND'S



NEW IMPROVED PATENT EIGHT-FLANGE FIRE-PROOF SAFE.

THE only Eight-Flange Safe in the world, and containing more improvements than ANY SAFE made, such as:

1st. THE PATENT INSIDE BOLT WORK, which is placing the bolt work with the whole of the filling (six inches) between it and the outside, that is, as far from the fire and thief as it can be.

2nd. THE PATENT HINGED CAP—the back plate of the door being on hinges, enabling the owner, by turning a thumbscrew, to have easy access to the lock and bolt-work. He can thus easily change the lock, clean, oil, and keep the bolt-work in good order.

3rd. IRON INSIDE LINING, stronger than wood, and which retains the moisture in the filling for an indefinite time. Wood is thicker and weaker, and after a few years absorbs the moisture and "requires filling over again."

4th, FOUR-WHEEL COMBINATION LOCKS, the simplest, strongest, most efficient and easiest to change of any in use.

5th. SOLID ANGLE IRON FRONTS, BACKS AND CORNERS, which prevents warping or injury to safe from falling, or falling walls or timbers.

6th. EIGHT FLANGES—the most important improvement ever made in fire-proof safes, providing eight laps, thus preventing the passage of heat, it having to pass over twelve inches, no injury arises from this source, as in other safes containing one, two or three flanges.

THESE SAFES have stood the test of years, and the greatest fires on this continent, and have the *CHAMPION RECORD* in the *Boston, Chicago and Haverhill Fires*.

We are selling these safes as low as any good safe, and are disposing of large numbers throughout the Dominion

BANK WORK AND VAULT DOORS are specialties of our firm. For prices, testimonials and information, address,

JOSEPH JACOBS, GENERAL AGENT.

MORRIS & IRELAND, 64 Sudbury St., Boston Mass.

Because of the excellent facilities they possess, have been able to reduce the price of all goods manufactured by them, and by buying their raw material in the best markets, for cash, are prepared to give the purchasing public

THE BEST VALUE IN THE PROVINCE.

They are selling from thirty to fifty per cent. below prices asked some time ago in the same establishment.

Factory, Office and Showroom—King Square, Kent Street

Charlottetown, May 27, 1884—2aw wkly

Important Legal Decision.

THE VERDICT IN A HAMILTON CASE OF INTEREST TO BUSINESS MEN.

The Court of Appeal on Wednesday gave judgment in the case of Alexander vs. Wavell, which is somewhat important to commercial world. The action arose out of an assignment made by Ernest Kraft, of Hamilton, to Thomas Wavell, as trustee for the benefit of creditors. The deed of assignment contained a provision authorizing the trustee, until he should deem it advisable to dispose of the business, which was a harness and saddlery manufacturing establishment, to carry on the same, employing any person or persons as his agent or agents for such purpose, if he deems it best, paying him or them such reasonable allowance therefor as may be agreed upon, and to supply the said agent or agents with such goods and merchandise as may be requisite for such purpose. Under this deed the trustee took possession of the saddlery business. After the execution of the deed, John Alexander, of this city, obtained a judgment against Kraft and placed an execution in the hands of the sheriff and caused the sheriff to seize the goods in the possession of the trustees, contending that the deed was void on account of the provisions above referred to. An interpleader issue was directed to be tried before his honor the judge of this county, in which issue Mr. Alexander was made plaintiff and Mr. Wavell defendant, and upon such trial his honor held the deed void. From this decision Mr. Wavell appealed to the Court of Appeal, and the case was brought on for argument some months ago. The Court of Appeal have now given judgment, reversing the judgment of his honor, and holding the deed to be valid.—*Hamilton Times.*

Burned to Death.

TERRIBLE FATE OF AN INTOXICATED WOMAN AT QUEBEC.

QUEBEC, Oct. 19.—A most startling case of the burning to death of a woman during last night, has just come to light. It appears that the entire family, consisting of a man named Parent wife and son got intoxicated, and it is supposed knocked over a lamp, which set fire to Mrs. Parent's clothing. The police were attracted to the house by loud cries for their assistance, and upon arrival found the woman lying in the backyard with her entire clothing on fire, seemingly unconscious of her danger. The police managed to tear off her clothing, and at once conveyed her to the Marine Hospital, where she succumbed to her injuries to-day. She recovered consciousness previous to her death, but was unable to throw any light upon how the accident occurred. The husband and son were afterwards found in the house in a drunken stupor, being unaware of what had actually occurred.

A Woman's Struggle with a Bear.

VICTORIA, B. C., Oct. 18.—One day last week Mrs. W. K Lee discovered a bear swimming in the Columbia, and determined on its capture. The men folks were all away, but she summoned a posse, including the children, a boat, and the dog, and, armed with a butcher's knife, attempted to prevent a landing, while one of the children went after a neighbor who had a gun. The bear landed and showed fight. Mrs. Lee was treed once on a big rock, but gave chase again as the bear tried to make off. The bear turned on her again, and in retreating she tripped on a stick and went down, when the bear made a ferocious attack. She struck with the knife, and slashed it so severely on the nose that it went howling away long enough for her to regain her feet, and as the dog attacked vigorously she made good her escape. About this time the man with the gun settled the contest.

Canadian Catholicism.

MONTREAL, Oct. 20.—A letter recently received from Rome states that the question of naming an Archbishop for Montreal is receiving the attention of the Propaganda and the name most favorably received so far in connection with this high position is that of Mgr. Tache of Winnipeg. The same letter states that this question will be settled within the next few months, and that Mgr. Smeulders, having concluded his labors here as far as the Laval-Victoria is concerned, will return to Rome to report to the Propaganda, to be succeeded by another commissioner, who will be empowered to investigate the Landry-Hamel imbroglio. An attempt was made to have a cardinal appointed for Canada, but there is not much likelihood of this being effected.

Farm Notes.

Sir John Sinclair, one of the foremost agricultural writers of his or any other age advocataes the use of salt for the three following reasons:

1. That by allowing the sheep to lick it the rot was effectually prevented.

2. That the cattle to whom lumps of it were given to lick were thereby protected from infectious disorders, and the cows being thus rendered more healthy and being induced to take a greater quantity of liquid gave more milk; and,

3. That a small quantity pounded was found very beneficial to horses when new oats were given them, if the oats were at all moist.

A CARD.—To all who are suffering from errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send self-addressed envelope to REV. JOSEPH T. INMAN, *Station D, New York.*

CURRENT NOTES.

David Walk, of Indianapolis, has suddenly walked into a small fortune of $50,000, due wholly to the increased value of Kansas City property, in which he invested $1,500 only five years ago.

There has been a remarkable increase in the number of small farms at the South since the war. In South Carolina there are now five small farmers where there was one twenty years ago, and the number is steadily growing.

The British emigration statistics for the nine months ending on Sept. 30, show a decline of 70,000, over 30,000 of the number being Irish. The total number of British-born persons who have left the island since Jan. 1, is 200,078.

Lord Rosse, now visiting Philadelphia, is described as a horridly homely, slim, angular, smooth-faced dude of forty-five, but then he's a Lord, ye know, though most sensible girls would see more charm in the now conventional coachman.

Fifty years ago there was a boy in Africa who was taken prisoner in one of the fierce wars between the tribes, and was carried away from his home to be sold as a slave. After being sold and resold, now for sugar, and again for rum, he was finally carried away in a slave ship. A British cruiser captured the slaver. The boy is now Bishop Crowther, England's black bishop of Africa.

A Fredericton despatch reports:—Rev. A. V. Wiggins, rector of Westfield, was married this morning to Miss Ada Reading, daughter of the late Joel Reading, in the church at Westfield station. Miss Julia Reading, sister of the bride, was bridesmaid, and in this pleasing duty was assisted by two young girls, Miss Lucy Bridgman and Miss Bessie Schofield. Rev. Mr. Vroom was best man. The ceremony was performed by Rev. J. M. Davenport."

A recent letter says: France is literally one garden. Every inch of soil is cultivated. In riding from Paris to Dijon, 150 miles, we counted only thirty cattle. We saw no sheep or hogs. The farms have usually from one to ten acres. Some farms have half an acre, and some have as many as twenty acres. They are usually from thirty to three hundred feet wide and from fifteen hundred to two thousand feet long. There are no fences between them.

The Republicans appear to have emptied their purse in carrying Maine, Vermont and Ohio, as the managers of the campaign have just issued an earnest appeal for more funds. The committee say: "The late victories in Maine, Vermont and Ohio do not decide this contest. The great battle is yet to be fought, and unless the State of New York or Indiana can be secured to the Republican column in November the battle may eventually be lost." This appeal does not bespeak great confidence on the part of the Republicans, who have already assessed every office holder in the land for a contribution to the campaign funds. It is a pretty commentary on free government this employment of public money and prostitution of government patronage in bribing the electors.

Recent statistics as to the employments of women in England, reveal an unexpected number engaged in pursuits which are popularly supposed to be monopolized by men. There are 347 female blacksmiths, who actually swing heavy hammers, and 9138 women employed in nail making, who make nails for horseshoes. Coming down to less violent manual labor, 10,592 women bind books and 2362 assist in printing them. In intellectual occupations women also fill an important place, the number of teachers being 123,995; of missionaries and preachers, 7162; of clerks in the civil service, 3260; of painters, 1180; of "students," 1000, and of engravers, 64. Then there are 37,910 women engaged in medical and surgical work, nursing, etc., 452 busy themselves in editing, compiling and writing books, 1309 are employed in the various departments of photography.

A company in New Jersey is making paper counterpanes and pillow shams. Number 1 manilla paper is used, two large sheets being held together by small twine at intervals of three or four inches, gummed so as to stick the sheets together where the twine lies. The twine strengthens the paper. The margin of the counterpane has a hem, in which is more of the twine to keep it from tearing. Beautiful designs are printed on the upper surface of the counterpane and pillow shams, which make a very neat appearance. When they became wrinkled they can be made smooth by flat hot irons. They retail at seventy five cents a set. The counterpane can be left on the bed when it is occupied if so desired, and in cold weather it will be found a very neat and warm article of bed clothing, since the paper will prevent the escape of heat about as well as a woolen blanket.

If Canada has been taking the lead in the science of weather prophecy, Australia is going a step further and is, if one of her inventions prove successful, to be able to regulate the weather. A New South Wales man has, it is said, contrived what he calls a rain machine, which is designed to force a supply of moisture, when required, from the clouds. The *modus operandi* is the use of a ballon charged with dynamite, which, being sent aloft, the explosive is fired by a wire connecting the apparatus with the earth. The result, the inventor claims, will be a fall of rain more or less copious according to the condition of the atmosphere. According to the *Sanitary News*, which is of opinion that in this era of marvellous inventions, no useful contrivance submitted to public consideration should be rashly slighted, the ingenious inventor was to have an opportunity of testing his machine in some of the drouthy districts of the colony. If his hopes are confirmed, the discovery will be no common boon. But perhaps it is only a *canard*. The Australians are given that way.
